New Perspectives on Creating Web Pages with HTML Dec 29 2022 With coverage of code updated to reflect HTML 4.01 standards, this text teaches how to create hyperlinks to Web pages, e-mail addresses, newsgroups, and FTP sites using HTML.

Sorting Algorithm Tutorials - Herong's Tutorial Examples May 22 2022 This book is a collection of notes and sample codes written by the author while he was learning sorting algorithms. Topics include introduction of sorting algorithms: Bubble Sort, Heap Sort, Insertion Sort, Merge Sort, Quicksort, Selection Sort, Shell Sort; Sorting algorithm implementations in Java, PHP, Perl and Python; Sorting algorithm performance comparison. Updated in 2020 (Version v6.11) with minor changes. For latest updates and free sample chapters, visit <https://www.herongyang.com/Sort>.

The Java Tutorial Nov 16 2021 The Java® Tutorial, Sixth Edition, is based on the Java Platform, Standard Edition (Java SE) 8. This revised and updated edition introduces the new features added to the platform, including lambda expressions, default methods, aggregate operations, and more. An accessible and practical guide for programmers of any level, this book focuses on how to use the rich environment provided by Java to build applications, applets, and components. Expanded coverage includes a chapter on the Date-Time API and a new chapter on annotations, with sections on type annotations and pluggable type systems as well as repeating annotations. In addition, the updated sections “Security in Rich Internet Applications” and “Guidelines for Securing Rich Internet Applications” address key security topics. The latest deployment best practices are described in the chapter “Deployment in Depth.” If you plan to take one of the Java SE 8 certification exams, this book can help. A special appendix, “Preparing for Java Programming Language Certification,” details the items covered on the available exams. Check online for updates. All of the material has been thoroughly reviewed by members of Oracle Java engineering to ensure that the information is accurate and up to date. This book is based on the online tutorial hosted on Oracle Corporation’s website at <http://docs.oracle.com/javase/tutorial>.

New Perspectives on Microsoft PowerPoint 2013, Comprehensive Enhanced Edition May 10 2021 Readers develop the Microsoft PowerPoint 2013 skills for academic and career success with this latest edition from the popular New Perspectives Series. Updated with all-new case-based tutorials, NEW PERSPECTIVES MICROSOFT POWERPOINT 2013, COMPREHENSIVE ENHANCED EDITION continues to apply MS PowerPoint 2013 skills to real situations that fully demonstrate the relevance of concepts. A proven learning approach emphasizes critical thinking, problem-solving, and in-depth coverage. A new Troubleshoot case problem enhances analytical skills, while a new tutorial on Managing Your Files helps readers navigate Windows 8. Readers discover success with MS PowerPoint 2013 as NEW PERSPECTIVES MICROSOFT POWERPOINT 2013 emphasizes the value and application of what they are learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Java Tutorial Oct 15 2021 The Java® Tutorial, Fifth Edition, is based on Release 7 of the Java Platform Standard Edition. This revised and updated edition introduces the new features added to the platform, including a section on NIO.2, the new file I/O API, and information on migrating legacy code to the new API. The deployment coverage has also been expanded, with new chapters such as “Doing More with Rich Internet Applications” and “Deployment in Depth,” and a section on the fork/join feature has been added to the chapter on concurrency. Information reflecting Project Coin developments, including the new try-with-resources statement, the ability to catch more than one type of exception with a single exception handler, support for binary literals, and diamond syntax, which results in cleaner generics code, has been added where appropriate. The chapters covering generics, Java Web Start, and applets have also been updated. In addition, if you plan to take one of the Java SE 7 certification exams, this guide can help. A special appendix, “Preparing for Java Programming Language Certification,” lists the three exams available, details the items covered on each exam, and provides cross-references to where more information about each topic appears in the text. All of the material has been thoroughly reviewed by members of Oracle Java engineering to ensure that the information is accurate and up to date.

New Perspectives on Creating Web Pages with HTML Apr 21 2022 Part of our New Perspectives Series, this text offers a case-oriented, problem-solving approach to learning the basics of HTML coding of documents. Through an on-going case, this concise, engaging book teaches students how to create their own online resume.

Advanced PHP for Flash Feb 07 2021 Advanced PHP for Flash is the follow-up to the hugely popular Foundation PHP for Flash. The main aim of this book is to extend the reader's knowledge of using PHP and MySQL to produce dynamic content for Flash. Essentially, it picks up the baton from the first book and runs with it until there's no more road. The book takes the reader from being an intermediate to an advanced PHP/Flash developer, and helps them create some awesome Flash-based web applications along the way. It covers the core PHP features, as well as some exciting extras, that follow on directly from the knowledge gained in the first chapter, and show the reader how to use them in real-world applications. This book covers: Sessions File Uploading Advanced MySQL Socket Functions PHP and XML Ming Plus fully functional case studies This book is aimed squarely at those readers who want to create dynamic Flash-based web applications, and especially at those who have finished the first book and are hungry for more. As this book is pitched at those with an intermediate knowledge of PHP (and a decent grasp of MySQL) it has the advantage of being useful to both programmers and those coming over from the first book.

CATIA V5-6R2017 for Designers, 15th Edition Aug 01 2020 CATIA V5-6R2017 for Designers is a comprehensive book written with the intention of helping the readers effectively use all solid modeling tools and other features of CATIA V5-6R2017. This book provides elaborate and clear explanation of tools of all commonly used workbenches of CATIA V5-6R2017. After reading this book, you will be able to create, assemble, and draft models. The chapter on the DMU Kinematics workbench will enable the users to create, edit, simulate, and analyze different mechanisms dynamically. The chapter on Generative Shape Design explains the concept of hybrid designing of models. Also, it enable the users to quickly model both simple and complex shapes using wireframe, volume and surface features. The chapter on the FreeStyle workbench will enable the users to dynamically design and manipulate surfaces. In this book, a chapter on FEA and structural analysis has been added to help users to analyze their own designs by calculating stresses and displacements using various tools available in the Advanced Meshing Tools and Generative Structural Analysis workbenches of CATIA V5-6R2017. The book explains the concepts through real-world examples and the tutorials used in this book. After reading this book, the users will be able to create solid parts, sheet metal parts, assemblies, weldments, drawing views with bill of materials, presentation views to animate the assemblies, analyze their own designs and apply direct modeling techniques to facilitate rapid design prototyping. Also, the users will learn the editing techniques that are essential for making a successful design. Salient Features Consists of 19 chapters that are organized in a pedagogical sequence. Detailed explanation of CATIA V5-6R2017 tools. First page summarizes the topics covered in the chapter. Hundreds of illustrations and comprehensive coverage of CATIA V5-6R2017 concepts and techniques. Step-by-step instructions that guide the users through the learning process. More than 40 real-world mechanical engineering designs as tutorials and projects. Technical support by contacting techsupport@cadcim.com. Additional learning resources at <https://allaboutcadcam.blogspot.com> Table of Contents Chapter 1: Introduction to CATIA V5-6R2017 Chapter 2: Drawing Sketches in the Sketcher Workbench-I Chapter 3: Drawing Sketches in the Sketcher Workbench-II Chapter 4: Constraining Sketches and Creating Base Features Chapter 5: Reference Elements and Sketch-Based Features Chapter 6: Creating Dress-Up and Hole Features Chapter 7: Editing Features Chapter 8: Transformation Features and Advanced Modeling Tools-I Chapter 9: Advanced Modeling Tools-II Chapter 10: Working with the Wireframe and Surface Design Workbench Chapter 11: Editing and Modifying Surfaces Chapter 12: Assembly Modeling Chapter 13: Working with the Drafting Workbench-I Chapter 14: Working with the Drafting Workbench-II Chapter 15: Working with the Sheet Metal Components Chapter 16: DMU Kinematics Chapter 17: Introduction to Generative Shape Design Chapter 18: Working with the FreeStyle Workbench Chapter 19: Introduction to FEA and Generative Structural Analysis Index

New Perspectives on Microsoft FrontPage 2002 Dec 05 2020 Part of the New Perspectives series, this text offers a case-based, problem-solving approach and innovative technology for meaningful learning of Microsoft FrontPage 2002.

Lotus 1-2-3, Release 2.4 for Business Aug 21 2019 Part of our New Perspectives Series, this text offers a case-oriented, problem-solving approach for learning this powerful spreadsheet. This Comprehensive title covers the basic to more advanced features of Lotus 1-2-3 R2.4, from creating and modifying a worksheet to developing and using macros..

New Perspectives on Microsoft Excel 2002 Jan 18 2022 Part of the New Perspectives series, this text offers a case-based, problem-solving approach and innovative technology for meaningful learning of Microsoft Excel 2002.

How Assessment Supports Learning Jul 12 2021 How Assessment Supports Learning: Learning-oriented Assessment in Action invites teachers in higher education to rethink the purposes of assessment and to revise their assessment practices in the interests of improved student learning. It combines practice, theory, research and extensive examples of assessment techniques to support academics in this vital part of their multi-faceted role. This book presents 39 innovative assessment practices from a range of disciplines and located in a clearly articulated theoretical framework. This framework is congruent with outcomes-based approaches, currently being implemented in universities in Hong Kong and elsewhere. The practices, which can be modified for use in a wide range of contexts, illustrate how assessment can be used to engage students in productive learning, provide genuinely helpful feedback efficiently, and help students learn to evaluate and improve the quality of their own work. The book concludes with suggestions for responding to challenges at the interface between assessment and learning.

Programming Multiplayer Games Dec 25 2019 This book covers all the major aspects and theory behind creating a fully functional network game, from setting up a stable MySQL back-end database for storing player information to developing a reusable TCP/IP network library for online games as well as developing web-based server interfaces. This title

focuses on sockets rather than DirectPlay, which allows for multiplatform development as opposed to developing game servers solely for Windows-based servers and focuses on MySQL and PHP4 as development tools as well as the multiplatform use of OpenGL. Includes CD.

The Leading Edge Jan 26 2020

Moviemaking with your Camera Field Guide Jun 30 2020 Any photographer with a modern digital camera can be a moviemaker, and this book shows you all the skills you'll need to shoot everything, from a video-blog to a feature film. Build on your photographic skills ? this knowledge predisposes you to create great cinematography ? and understand the technical and practical necessities of high-definition video. The *Moviemaking With Your Camera Field Guide* shows you how you can build on what you already know to create truly spectacular movies with your DSLR in whatever genre you choose. It introduces everything from the language of film and basic equipment you will need, to the art of post-production and publishing your new work. Exclusive video content to accompany this book is available online.

New Perspectives on Data Driven Web Sites with Microsoft Access 2000 Sep 02 2020 Part of the New Perspectives Series, this innovative text is perfect for a class on building databases to drive electronic commerce Web sites, or as a companion to any Microsoft Access text.

New Perspectives on Microsoft Office 2013, First Course Nov 23 2019 With proven pedagogy that emphasizes critical-thinking, problem-solving, and in-depth coverage, *New Perspectives* helps students develop the Microsoft Office 2013 skills they need to be successful in college and beyond. Updated with all new case-based tutorials, *New Perspectives* Microsoft Office 2013 continues to engage students in applying skills to real-world situations, making concepts relevant. A new Troubleshoot case problem enhances critical thinking, and a new tutorial on Managing Your Files helps students navigate Windows 8. As always, *New Perspectives* improves learning outcomes and transference of skills by helping students understand why what they're learning is important. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

New Perspectives on Microsoft FrontPage 2000 Oct 03 2020 Part of our New Perspectives Series, this text offers a case-oriented, problem-solving approach to learning the key features of Microsoft FrontPage 2000.

New Perspectives on Creating Web Pages with HTML and Dynamic HTML Jul 24 2022 Part of the New Perspectives Series, this text teaches students how to create simple to complex Web sites using HTML, and Dynamic HTML. Students are asked to think critically in order to solve problems and complete Case Studies, which reinforces key concepts critical to creating Web pages.

New Perspectives on Microsoft Access 2000 Nov 28 2022 Part of the New Perspectives series, this text offers a case-based, problem-solving approach and innovative technology for meaningful learning of Microsoft Access 2000.

Human Computer Interaction Handbook Jan 06 2021 Winner of a 2013 CHOICE Outstanding Academic Title Award The third edition of a groundbreaking reference, *The Human-Computer Interaction Handbook: Fundamentals, Evolving Technologies, and Emerging Applications* raises the bar for handbooks in this field. It is the largest, most complete compilation of HCI theories, principles, advances, case st

Robust Integration of Model-Based Fault Estimation and Fault-Tolerant Control Jun 23 2022 *Robust Integration of Model-Based Fault Estimation and Fault-Tolerant Control* is a systematic examination of methods used to overcome the inevitable system uncertainties arising when a fault estimation (FE) function and a fault-tolerant controller interact as they are employed together to compensate for system faults and maintain robustly acceptable system performance. It covers the important subject of robust integration of FE and FTC with the aim of guaranteeing closed-loop stability. The reader's understanding of the theory is supported by the extensive use of tutorial examples, including some MATLAB®-based material available from the Springer website and by industrial-applications-based material. The text is structured into three parts: Part I examines the basic concepts of FE and FTC, providing extensive insight into the importance of and challenges involved in their integration; Part II describes five effective strategies for the integration of FE and FTC: sequential, iterative, simultaneous, adaptive-decoupling, and robust decoupling; and Part III begins to extend the proposed strategies to nonlinear and large-scale systems and covers their application in the fields of renewable energy, robotics and networked systems. The strategies presented are applicable to a broad range of control problems, because in the absence of faults the FE-based FTC naturally reverts to conventional observer-based control. The book is a useful resource for researchers and engineers working in the area of fault-tolerant control systems, and supplementary material for a graduate- or postgraduate-level course on fault diagnosis and FTC. *Advances in Industrial Control* reports and encourages the transfer of technology in control engineering. The rapid development of control technology has an impact on all areas of the control discipline. The series offers an opportunity for researchers to present an extended exposition of new work in all aspects of industrial control.

New Perspectives on Microsoft Excel 2002 Aug 13 2021

AutomationML Sep 21 2019 This book provides a comprehensive in-depth look into the practical application of AutomationML Edition 2 from an industrial perspective. It is a cookbook for advanced users and describes re-usable pattern solutions for a variety of industrial applications and how to implement it in software. Just to name some: AutomationML modelling of AAS, MTP, SCD, OPC UA, Automation Components, Automation Projects, drive configurations, requirement models, communication systems, electrical interfaces and cables, or semantic integration aspects as eClass integration or handling of semantic heterogeneity. This book guides through the universe of AutomationML from industrial perspective. It is written by AutomationML experts that have industrially implemented AutomationML in pattern solutions for a large variety of applications. This book is structured into three major parts. • Part I: software implementation for developers • Part II: re-usable industrial pattern solutions and domain models • Part III: outlook into future AutomationML applications Additional material to the book and more information about AutomationML on the website: <https://www.automationml.org/about-automationml/publications/amlbook/>

Reasoning Web. Learning, Uncertainty, Streaming, and Scalability May 30 2020 This volume contains lecture notes of the 14th Reasoning Web Summer School (RW 2018), held in Esch-sur-Alzette, Luxembourg, in September 2018. The research areas of Semantic Web, Linked Data, and Knowledge Graphs have recently received a lot of attention in academia and industry. Since its inception in 2001, the Semantic Web has aimed at enriching the existing Web with meta-data and processing methods, so as to provide Web-based systems with intelligent capabilities such as context awareness and decision support. The Semantic Web vision has been driving many community efforts which have invested a lot of resources in developing vocabularies and ontologies for annotating their resources semantically. Besides ontologies, rules have long been a central part of the Semantic Web framework and are available as one of its fundamental representation tools, with logic serving as a unifying foundation. Linked Data is a related research area which studies how one can make RDF data available on the Web and interconnect it with other data with the aim of increasing its value for everybody. Knowledge Graphs have been shown useful not only for Web search (as demonstrated by Google, Bing, etc.) but also in many application domains.

New Perspectives on Microsoft Excel 2002 Aug 25 2022

New Perspectives on Microsoft PowerPoint 2002 Sep 14 2021 Part of the New Perspectives series, this text offers a case-based, problem solving approach and innovative technology for meaningful learning of Microsoft PowerPoint 2002.

The Java Tutorial Sep 26 2022 Based on the online version that has become one of the world's most visited programmer documentation sites, this is a remarkably clear, practical, hands-on introduction to the Java 2 Platform. The bonus CD-ROM contains all major versions of the Java Platform.

Visual Basic: A Beginner's Tutorial Dec 17 2021 Designed as a beginner's tutorial to the latest version of Visual Basic, this informative guide discusses the most important features of the language and teaches how to use the .NET Framework. Written with clarity and readability in mind, it introduces important programming concepts and explains the process of building real-world applications, both desktop and web-based. With the most comprehensive coverage possible in a book for beginners, it includes such topics as VB language syntax, object-oriented programming, working with numbers and dates, error handling, input output, generics, annotations, database access, security, and application deployment.

GIS Tutorial for Health Apr 28 2020 Designed to benefit health management students and practitioners, this illustrated tutorial is an introduction to help students investigate patterns of uninsured and poor populations, prepare spatial data to analyze environmental hazards, analyze youth pedestrian injuries, and more. This edition is updated for ArcGIS 9.2.

Microsoft Outlook 2002 Jun 11 2021 A part of the New Perspectives series, this text offers a case-based, problem-solving approach to the basics of Microsoft Outlook 2002 including integration with other Microsoft Office applications.

Navigating Problem Based Learning Nov 04 2020 This title is directed primarily towards health care professionals outside of the United States. Many medical and health professional schools have replaced their traditional curriculum with problem based learning, or a derivative. This book is designed to provide a comprehensive guide and resource for students in the early years of these courses, and will assist them to adapt their learning style to working with others in small groups. The book explains the differences between PBL and traditional learning, the aims and essential elements of PBL, and provides the keys for successful group discussion. Students are shown how to define the learning issues and how to construct their own mechanisms for each case they study, before moving on to the aims and tools commonly used in assessment, and tips for increasing scores in examinations. The book will also assist tutors to design cases. Examples of PBL cases, assessment questions, mechanisms and flow diagrams Keys for successful group discussion, tips for self-directed learning and for passing examinations. Instruction for using reflective journals and other resources.

Tutorial on Reed-Solomon Error Correction Coding Mar 20 2022

Cost-Justifying Usability Apr 09 2021 You just know that an improvement of the user interface will reap rewards, but how do you justify the expense and the labor and the time—guarantee a robust ROI!—ahead of time? How do you decide how much of an investment should be funded? And what is the best way to sell usability to others? In this completely revised and new edition of *Cost-Justifying Usability*, Randolph G. Bias (University of Texas at Austin, with 25 years' experience as a usability practitioner and manager) and Deborah J. Mayhew (internationally recognized usability consultant and author of two other seminal books including *The Usability Engineering Lifecycle*) tackle these and many other problems. It has been updated to cover cost-justifying usability for Web sites and intranets, for the complex applications we have today, and for a host of products—offering techniques, examples, and cases that are unavailable elsewhere. No matter what type of product you build, whether or not you are a cost-benefit expert or a born salesperson, this book has the tools that will enable you to cost-justify the appropriate usability investment. Includes contributions by a host of experts involved in this work, including Aaron Marcus, Janice Rohn, Chauncey Wilson, Nigel Bevan, Dennis Wixon, Clare-Marie Karat, Susan Dray, Charles Mauro, and many others Includes actionable ideas for every phase of the software development process Includes case studies from inside a variety of companies Includes ideas from "the other side of the table," software executives who hold the purse strings, who offer thoughts on which proposals for usability support they've funded, and which ones they've declined

New Perspectives on Microsoft Office XP Oct 27 2022 Part of the New Perspectives series, this text offers a case-based, problem-solving approach and innovative technology for meaningful learning of Microsoft Office XP.

New Perspectives on Microsoft Internet Explorer 4 Feb 25 2020

SOLIDWORKS 2020: A Tutorial Approach, 5th Edition Mar 08 2021 *SOLIDWORKS 2020: A Tutorial Approach* introduces readers to *SOLIDWORKS 2020* software, one of the

world's leading parametric solid modeling packages. In this book, the author has adopted a tutorial-based approach to explain the fundamental concepts of SOLIDWORKS. This book has been written with the tutorial point of view and the learn-by-doing theme to help the users easily understand the concepts covered in it. The book consists of 12 chapters that are structured in a pedagogical sequence that makes the book very effective in learning the features and capabilities of the software. The book covers a wide range of topics such as Sketching, Part Modeling, Assembly Modeling, Drafting in SOLIDWORKS 2020. In addition, this book covers the basics of Mold Design, FEA, and SOLIDWORKS Simulation. Salient Features Consists of 12 chapters that are organized in a pedagogical sequence. Tutorial approach to explain various concepts of SOLIDWORKS 2020. First page of every chapter summarizes the topics that are covered in it. Step-by-step instructions that guide the users through the learning process. Real-world mechanical engineering designs as tutorials and projects. Additional information throughout the book in the form of notes and tips. Self-Evaluation Tests and Review Questions at the end of the chapters for the users to assess their knowledge. Additional learning resources at <https://allaboutcadcam.blogspot.com> Table of Contents Chapter 1: Introduction to SOLIDWORKS 2020 Chapter 2: Drawing Sketches for Solid Models Chapter 3: Editing and Modifying Sketches Chapter 4: Adding Relations and Dimensions to Sketches Chapter 5: Advanced Dimensioning Techniques and Base Feature Options Chapter 6: Creating Reference Geometries Chapter 7: Advanced Modeling Tools-I Chapter 8: Advanced Modeling Tools-II Chapter 9: Assembly Modeling Chapter 10: Working with Drawing Views Chapter 11: Introduction to FEA and SOLIDWORKS Simulation Chapter 12: Introduction to Mold Design Student Project Index

New Perspectives on Microsoft Windows 2000 MS-DOS Command Line Mar 28 2020 Part of the New Perspectives Series, this text offers a case based, problem-solving approach to learning basic through advanced Microsoft DOS skills.

Performance Evaluation of Complex Systems: Techniques and Tools Oct 23 2019 This book presents the tutorial lectures given by leading experts in the area at the IFIP WG 7.3 International Symposium on Computer Modeling, Measurement and Evaluation, Performance 2002, held in Rome, Italy in September 2002. The survey papers presented are devoted to theoretical and methodological advances in performance and reliability evaluation as well as new perspectives in the major application fields. Modeling and verification issues, solution methods, workload characterization, and benchmarking are addressed from the methodological point of view. Among the applications dealt with are hardware and software architectures, wired and wireless networks, grid environments, Web services, and real-time voice and video processing. This book is intended to serve as a state-of-the-art survey and reference for students, scientists, and engineers active in the area of performance and reliability evaluation.

New Perspectives on Microsoft Excel 2000 Feb 19 2022 Part of the New Perspectives series, this text offers a case-based, problem-solving approach for learning the basic features of Microsoft Excel 2000.
