Make Just One Change Oct 14 2021 The authors of Make Just One Change argue that formulating one's own questions is "the single most essential skill for learning"—and one that should be taught to all students. They also argue that it should be taught in the simplest way possible. Drawing on twenty years of experience, the authors present the Question Formulation Technique, a concise and powerful protocol that enables learners to produce their own questions, improve their questions, and strategize how to use them. Make Just One Change features the voices and

experiences of teachers in classrooms across the country to illustrate the use of the Question Formulation Technique across grade levels and subject areas and with different kinds of learners.

Questions About Questions Apr 20 2022 The social survey has become an essential tool in modern society, providing crucial measurements of social change, describing social life, and guiding government policy. But the validity of surveys is fragile and depends ultimately upon the accuracy of answers to survey questions. As our dependence on surveys grows, so too have questions about the accuracy of survey responses. Authored by a group of experts in cognitive psychology, linguistics, and survey research, Questions About Questions provides a broad review of the survey response problem. Examining the cognitive and social processes that influence the answers to questions, the book first takes up the problem of meaning and demonstrates that a respondent must share the survey researcher's intended meaning of a question if the response is to be revealing and informative. The book then turns to an examination of memory. It provides a framework for understanding the processes that can introduce errors into retrospective reports, useful

guidance on when those reports are more or less trustworthy, and investigates techniques for the improvement of such reports. Questions about the rigid standardization imposed on the survey interview receive a thorough airing as the authors show how traditional survey formats violate the usual norms of conversational behavior and potentially endanger the validity of the data collected. Synthesizing the work of the Social Science Research Council's Committee on Cognition and Survey Research, *Questions About Questions* emphasizes the reciprocal gains to be achieved when insights and techniques from the cognitive sciences and survey research are exchanged. "these chapters provide a good sense of the range of survey problems investigated by the cognitive movement, the methods and ideas it draws upon, and the results it has yielded."

[Banned Questions About the Bible](#) Dec 04 2020
From Christian Piatt: "When I was a teenager, my youth minister threw a bible at my head for asking questions." Too often, for various reasons, people don't have the opportunity to ask the hard questions they have about faith, religion, salvation and the bible. And when questions are left unanswered in communities of faith, people

either seek answers elsewhere or lose interest all together. The purpose of the series is to collect the most compelling and challenging questions from various theological areas and pose them to a panel of "experts" who are challenged with responding in two hundred words or less in plain English. This volume addresses challenging or controversial questions about scripture collected from people on Facebook, MySpace, Twitter and other social networking media. Respondents include theology professors, clergy, lay leaders, liberals, conservatives and voices representing a spectrum of views. The idea behind the books is not so much to provide definitive answers as it is to stimulate thought, reflection and discussion. By offering multiple perspectives, readers have the opportunity to arrive at their own questions. Better, they come to understand that questioning faith is not taboo, but rather that it can be at the foundation of a strong and growing faith. The directive given to each respondent guided them to be concise and to speak in plain language, but also not to rely exclusively on "the Bible says it" justifications, or to wax abstract or overly intellectual. Instead, they write from personal experience as much as possible, and provide real-life contexts that will allow the average seeker or

churchgoer to apply such ideas to their daily lives.

40 Questions About the Historical Jesus Aug 20 2019 Answers to critical questions regarding the study of the Jesus of history and the Christ of faith The conclusions of the quest for the historical Jesus, which casts the majority of Christ's life as a myth, are a stark contrast to the orthodox view of Christ as presented in the Bible. Pate demonstrates that a critical analysis of the gospel text along with historical and cultural methods of investigation actually point toward an orthodox view of Christ. This work argues that the canonical Gospels are the most trustworthy information we have about the gospel writers as well as the life and ministry of Jesus, including his death, visit to hades, resurrection, and ascension. Readers will be encouraged by the reliability of the Gospel writers, the reality of Jesus' humanity and deity, and the inferiority of the apocryphal gospels.

100 Questions about Women and Politics Jun 29 2020 Both yesterday's suffragists and today's feminists have battled for women to vote and hold office, and their successes have made it possible for countries such as Argentina, Brazil, Germany, Iceland, Liberia, and the United Kingdom to have female heads of state. Despite these notable advances, women are still largely underrepresented in parliaments and governments around the world. Why, after so many years of feminist struggle, are women still obstructed from full political citizenship by a glass ceiling? Manon Tremblay's 100 Questions about Women and Politics discusses electoral politics in Canada and abroad, focusing on women's rights to vote and run for office in legislative elections, political parties, voting systems, electoral quotas for women, and participation in parliaments and governments. Against a background of

observations taken from academic research, Tremblay uses an innovative approach by dividing her book into 100 questions and answers to address a range of important issues. Are electorates sexist or lesbophobic? Are family responsibilities a real obstacle to women's engagement in politics? What strategies are available to increase the number of female politicians? Are gender quotas democratic? Once elected to office, do women represent women? How does women's political citizenship in Canada compare to that in other countries? A timely book on the unfinished work of representative democracy, *100 Questions about Women and Politics* takes a comprehensive yet concise approach to demystifying the major issues dominating the study of gender and government.

That's Not What Happened May 09 2021 From New York Times bestseller Kody Keplinger comes an astonishing and thought-provoking exploration of the aftermath of tragedy, the power of narrative, and how we remember what we've lost. It's been three years since the Virgil County High School Massacre. Three years since my best friend, Sarah, was killed in a bathroom stall during the mass shooting. Everyone knows Sarah's story--that she died proclaiming her faith. But it's not true. I know because I was with her when she died. I didn't say anything then, and people got hurt because of it. Now Sarah's parents are publishing a book about her, so this might be my last chance to set the record straight . . . but I'm not the only survivor with a story to tell about what did--and didn't--happen that day. Except Sarah's martyrdom is important to a lot of people, people who don't take kindly to what I'm trying to do. And the more I learn, the less certain I am about what's right. I don't know what will be worse: the guilt of staying silent or the

consequences of speaking up . . .

The Age of Questions May 29 2020 A groundbreaking history of the Big Questions that dominated the nineteenth century In the early nineteenth century, a new age began: the age of questions. In the Eastern and Belgian questions, as much as in the slavery, worker, social, woman, and Jewish questions, contemporaries saw not interrogatives to be answered but problems to be solved. Alexis de Tocqueville, Victor Hugo, Karl Marx, Frederick Douglass, Fyodor Dostoevsky, Rosa Luxemburg, and Adolf Hitler were among the many who put their pens to the task. The Age of Questions asks how the question form arose, what trajectory it followed, and why it provoked such feverish excitement for over a century. Was there a family resemblance between questions? Have they disappeared, or are they on the rise again in our time? In this pioneering book, Holly Case undertakes a stunningly original analysis, presenting, chapter by chapter, seven distinct arguments and frameworks for understanding the age. She considers whether it was marked by a progressive quest for emancipation (of women, slaves, Jews, laborers, and others); a steady, inexorable march toward genocide and the "Final Solution"; or a movement toward federation and

the dissolution of boundaries. Or was it simply a farce, a false frenzy dreamed up by publicists eager to sell subscriptions? As the arguments clash, patterns emerge and sharpen until the age reveals its full and peculiar nature. Turning convention on its head with meticulous and astonishingly broad scholarship, *The Age of Questions* illuminates how patterns of thinking move history.

A More Beautiful Question Aug 12 2021 To get the best answer-in business, in life-you have to ask the best possible question. Innovation expert Warren Berger shows that ability is both an art and a science. It may be the most underappreciated tool at our disposal, one we learn to use well in infancy-and then abandon as we grow older. Critical to learning, innovation, success, even to happiness-yet often discouraged in our schools and workplaces-it can unlock new business opportunities and reinvent industries, spark creative insights at many levels, and provide a transformative new outlook on life. It is the ability to question-and to do so deeply, imaginatively, and "beautifully." In this fascinating exploration of the surprising power of questioning, innovation expert Warren Berger reveals that powerhouse businesses like Google,

Nike, and Netflix, as well as hot Silicon Valley startups like Pandora and Airbnb, are fueled by the ability to ask fundamental, game-changing questions. But Berger also shares human stories of people using questioning to solve everyday problems—from “How can I adapt my career in a time of constant change?” to “How can I step back from the daily rush and figure out what really makes me happy?” By showing how to approach questioning with an open, curious mind and a willingness to work through a series of “Why,” “What if,” and “How” queries, Berger offers an inspiring framework of how we can all arrive at better solutions, fresh possibilities, and greater success in business and life.
