This fictional re-creation of the battle of Shiloh in April 1862 is a stunning work of imaginative history, from Shelby Foote, beloved historian of the Civil War. Shiloh conveys not only the bloody choreography of Union and Confederate troops through the woods near Pittsburg Landing, Tennessee, but the inner movements of the combatants' hearts and minds. Through the eyes of officers and illiterate foot soldiers, heroes and cowards, Shiloh creates a dramatic mosaic of a critical moment in the making of America, complete to the haze of gunsmoke and the stunned expression in the eyes of dying men. Shiloh, which was hailed by The New York Times as "imaginative, powerful, filled with precise visual details... a brilliant book" fulfills the standard set by Shelby Foote's monumental three-part chronical of the Civil War. Over 100 researchers from 16 countries contribute to the first comprehensive handbook on post-traumatic stress disorder. Eight major sections present information on assessment, measurement, and research protocols for trauma related to war veterans, victims of torture, children, and the aged. Clinicians and researchers will find it an indispensable reference, touching on such disciplines and psychiatry, psychology, social work, counseling, sociology, neurophysiology, and political science. Written by a multi-disciplinary group of leading practitioners, Sexual Offending Against Children provides an account of the practice, policy and management issues involved in the assessment and treatment of adult and adolescent sexual offenders against children. Written for practitioners from all disciplines concerned with this area of work, it is underpinned by a strong theoretical base, giving a practical and detailed description of the management of sexual offenders, as well as the potential impact on service providers. This text presents key research findings about incidence, prevalence and characteristics about young sexual abusers. By presenting up-to-date models of policy and practice this will appeal to a wide audience. - How widespread is child sexual abuse? - Which groups of children are at greatest risk? - Why do offenders offend? - What are the initial and long-term effects of sexual abuse on victims? - How can child sexual abuse be prevented? - How should researchers approach the problem? David Finkelhor is a leading researcher in the field of family violence and child sexual abuse. He is the author of two previous books on the subject, "Sexually Victimized Children "and "Child Sexual Abuse: New Theory and Research." Finkelhor is also known for his work in other areas of family violence. He is a co-editor of "Dark Side of" Copyright © Libri GmbH. All rights reserved. Crime is one of the most significant political issues in contemporary American society. Crime control statistics and punishment policies are subjects of constant partisan debate, while the media presents sensationalized stories of criminal activity and over-crowded prisons. In the highly politicized arena of crime and justice, empirical data and reasoned analysis are often overlooked or ignored. The Handbook of Crime and Punishment, however, provides a comprehensive overview of criminal justice, criminology, and crime control policy, thus enabling a fundamental understanding of crime and punishment essential to an informed public. Expansive in its coverage, the Handbook presents materials on crime and punishment trends as well as timely policy issues. The latest research on the demography of crime (race, gender, drug use) is included and weighty current problems (organized crime, white collar crime, family violence, sex offenders, youth gangs, drug abuse policy) are examined. Processes and institutions that deal with accused and convicted criminals and techniques of punishment are also examined. While some articles emphasize American research findings and developments, others incorporate international research and offer a comparative perspective from other English-speaking countries and Western Europe. Editor Michael Tonry, a leading scholar of criminology, introduces the 28 articles in the volume, each contributed by an expert in the field. Designed for a wide audience, The Handbook is encyclopedic in its range and depth of content, yet is written in an accessible style. The most inclusive and authoritative work on the topic to be found in one volume, this book will appeal to those interested in the study of crime and its causes, effects, trends, and institutions; those interested in the forms and philosophies of punishment; and those interested in crime control. A guide for the design and implementation of treatment programs, this book emphasizes clinical issues over research and offers valuable suggestions for dealing with problems that arise in treatment. Contributors describe their work in prisons, psychiatric institutions, and community settings. Special attention is given to culturally sensitive treatments and to special populations, including professionals, clergy, juveniles, women, and the physically challenged. Explores how modern folklore, through its preservation of ballads and folktales, supplements our understanding of the oral tradition and enhances our knowledge of early literature. It is estimated that relapse prevention methods are employed in more than 90% of all North American sex offender treatment programs (of which there are more than 2,000). Comparable statistics are true in most industrialized countries around the world. Over the last decade a great deal has been learned about the treatment of sexual offenders, and particularly about relapse prevention. This sourcebook provides clinicians with the most current, practical, useable information about working with sex offenders to prevent relapse. It reflects the advances and insights of the past decade since the publication of Relapse Prevention with Sex Offenders , focusing on the major reconceptualizations, revisions, and innovations that will chart treatment programs for the first decade of the new millennium. A useful tool for practitioners, researchers, theorists, and advanced students, Handbook of Sexual Assault analyzes the nature and extent of the problem of sexual offending and classifies the types of offenders according to an empirically developed system. In addition, contributors present the theories of the etiology and maintenance of sexual offending; offer various perspectives and factors relevant to accurate assessment; and detail contemporary treatment procedures. A brand-new edition of the classic guide on low-speed wind tunnel testing While great advances in theoretical and computational methods have been made in recent years, low-speed wind tunnel testing remains essential for obtaining the full range of data needed to guide detailed design decisions for many practical engineering problems. This long-awaited Third Edition of William H. Rae, Jr.'s landmark reference brings together essential information on all aspects of low-speed wind tunnel design, analysis, testing, and instrumentation in one easy-to-use resource. Written by authors who are among the most respected wind tunnel engineers in the world, this edition has been updated to address current topics and applications, and includes coverage of digital electronics, new instrumentation, video and photographic methods, pressure-sensitive paint, and liquid crystal-based measurement methods. The book is organized for quick access to topics of interest, and examines basic test techniques and objectives of modeling and testing aircraft designs in low-speed wind tunnels, as well as applications to fluid motion analysis, automobiles, marine vessels, buildings, bridges, and other structures subject to wind loading. Supplemented with real-world examples throughout, Low-Speed Wind Tunnel Testing, Third Edition is an indispensable resource for aerospace engineering students and professionals, engineers and researchers in the automotive industries, wind tunnel designers, architects, and others who need to get the most from low-speed wind tunnel technology and experiments in their work. Captain Romulus Buckle and his zeppelin crew plan to rescue their kidnapped leader from the City of the Founders, but first they must survive the war zeppelins and aliens that infest the skies of post-apocalyptic Southern California. This important book is unique, thorough and timely. For parents and anyone who works with children, here is advice, insight, tips on how to help a child foil or frustrate a would-be molester, and straight talk unlike that in any other book available on the subject. Based on personal experiences, interviews with convicted child molesters, and intensive research, the book provides--for the education of parent and child--possible scenarios of seduction, possible indicators of potential abusers, sources of information and aid, legal information, summaries of references and an extensive bibliography. This book builds upon a foundation of research literature on incest victims and their families as well as the author's own clinical experience to provide a conceptual framework for intervention and treatment of the non-offending mother. Amply illustrated with case examples, the author, Virginia C. Strand, outlines a treatment model and gives suggestions for specific treatment strategies. Particular emphasis is paid to the context of the mother's situation, and how such factors as social class, ethnicity, age, and education must be taken into consideration when treating these clients. In addition, Strand provides helpful guidance to the therapist whose client must deal with the multiplicity of systems that are involved with intervention, investigation, and prosecution of child abuse cases. This book is a much needed guide for therapists, case workers, and other service providers who work with both the children who are incest victims, as well as their families. Presenting a detailed and coherent analysis, exploring the key aspects of working with children and young people with sexually harmful behaviours, this revised and expanded volume includes fresh and updated chapters, which address context and systems issues, assessment and planning, as well as interventions and practitioner issues. The major topics covered include: policy, law, organizational contexts and service provision in the UK developing a comprehensive inter-agency system of response the management of sexual behaviour problems in schools and in placements assessment issues and resilience based approaches the abuse of information technologies such as mobile phones and the Internet methods of intervention with children and young people and their families unconscious processes in therapeutic work and practitioner support. Written by well-respected contributors in this field and in an accessible manner, this text will be a valuable resource to a number of readers, including students, experienced professionals at front-line and managerial levels, and academics with an interest in this area of work.
