With helpful tips on how to select the freshest fish, preserve ingredients safely and bake the rustic bread essential to any Nordic meal, it's easy to make these dishes your own. Though Katrín isn't afraid to break a few rules in the name of convenience and flavor, her recipes remain rooted in the connection to nature and family that is at the heart of Nordic life. "A thrilling tale of abduction and escape in North Korea....highly entertaining." —The Washington Post

A propulsive and ambitious thriller about a woman trying to rescue her twin sister from captivity in North Korea, and the North Korean citizens with whom she forms an unlikely alliance

Star of the North opens in 1998, when a Korean American teenager is kidnapped from a South Korean beach by North Korean operatives. Twelve years later, her brilliant twin sister, Jenna, is still searching for her, and ends up on the radar of the CIA. When evidence that her sister may still be alive in North Korea comes to light, Jenna will do anything possible to rescue her--including undertaking a daring mission into the heart of the regime. Her story is masterfully braided together with two other narrative threads. In one, a North Korean peasant woman finds a forbidden international aid balloon and uses the valuables inside to launch a dangerously lucrative black-market business. In the other, a high-ranking North Korean official discovers, to his horror, that he may be descended from a traitor, a fact that could mean his death if it is revealed. As the novel progresses, these narrative strands converge and connect in surprising ways, ultimately building to an explosive and unforgettable

climax. For fans of Karen Foxlee's *Ophelia and the Marvelous Boy* comes a rollicking debut about a young girl's adventures in the far reaches of the icy north. When Emmeline's scientist parents mysteriously disappear, she finds herself heading for a safe house, where allies have pledged to protect her. But along the way, she is kidnapped by the villainous Doctor Siegfried Bauer, who is bound for the ice fields of Greenland. There he hopes to summon a mystical creature from the depths of the ancient glaciers, a creature said to be so powerful that whoever controls it can control the world. Unfortunately, Bauer isn't the only one determined to unleash the creature. The North Witch has laid claim to the mythical beast, too, and Emmeline—along with a scrappy stowaway named Thing—may be the only one with the power to save the world as we know it. Can Emmeline face one of the greatest legends of all time—and live to tell the tale? Of all prehistoric monuments, few are more emotive than the great stone circles that were built throughout Britain and Ireland. From the tall, elegant, pointed monoliths of the Stones of Stenness to the grandeur of Stonehenge and the sarsen blocks at Avebury, circles of stone exert a magnetic fascination to those who venture into their sphere. In Britain today, more people visit these structures than any other form of prehistoric monument and visitors stand in awe at their scale and question how and why they were erected. *Building the Great Stone Circles of the North* looks at the enigmatic stone structures of Scotland and investigates the background of their construction and their cultural significance. Robert Flaherty's *Nanook of the North* is one of the best-known documentaries of the silent era and has remained well-known throughout the world ever since its release in 1922. This study takes as its point of departure

the changes Nanook underwent from its premiere at the New York Capitol on June 11, 1922, to the sound version of 1947, the film's restoration in the 1970s, and later editions on different platforms. Accordingly, the book focuses on the different versions and editions of the film and the significant ways in which the different elements surrounding the film influence our perception. Mary, Queen of Scots' marriage to the Earl of Bothwell is notorious. Less known is Bothwell's first wife, Jean Gordon, who extricated herself from their marriage and survived the intrigue of the Queen's court. Daughters of the North reframes this turbulent period in history by focusing on Jean, who became Countess of Sutherland, following her from her birth as the daughter of the 'King of the North' to her disastrous union with the notorious Earl of Bothwell – and her lasting legacy to the Earldom of Sutherland. Contains list of members. The North Sea regions are some of the busiest shipping lanes in the world (which have recently seen the introduction of oil and gas rigs), and the surrounding land areas are some of the most populous. This book presents a historical investigation of great storms that have affected the North Sea and neighboring northern seas, the British Isles, and the fringe of northwest Europe. All those wind storms with serious effects that could be identified within the past 500-600 years are recorded and a few earlier cases discussed. In every case, observations of weather and other circumstances reported during the storm have been used to produce a modern and reasonably full meteorological analysis that will facilitate wind strength estimates and wind measurements and aid in the diagnosis of storm origins. As a scientific study, this work takes advantage of the unequaled abundance in this region of

historical reports and records. The book is destined to further meteorological understanding and help examine weather trends and secular variations and the impact of storms on human affairs, especially in damage to buildings, forests, and other aspects of the landscape, particularly coasts. It will be of interest to atmospheric scientists, engineers, geographers, historians, and administrators. Reproduction of the original.

Four hundred years in the future, women control the world but Khan Aurelius, ruler of the last free men, is determined to take back the power that has been denied men for centuries.

Outnumbered by far, he knows that women need to give up their power willingly and with one of their councilwomen as a hostage, he's certain he can influence her with his superior male intellect. She is just a soft woman, after all.

Councilwoman Pearl has sacrificed herself to save an innocent priestess. Trapped in the Northlands, her soft voice and sugar-coated view of the world doesn't impress Khan, who constantly challenges her by playing his mind games to corrupt her and see things his way. It's a battle of words and wills when the two intelligent rulers clash. Will Pearl succeed in bringing

enlightenment and democracy to the primitive Nmen or will Khan corrupt her with his charm first? The Ruler is the second installment in Elin Peer's Men of the North series that offers, drama, humor, and romance in a fabulous blend that will have you longing for more. Don't miss out on a great chance to escape from reality in this riveting story - get the book today!

An epic adventure: from the Vikings to the Enlightenment, from barbaric outpost to global hub, this book tells the dazzling history of northern Europe's transformation by sea. 'Pye writes like a dream. Magnificent' Jerry Brotton, author of A History of

the World in Twelve Maps _____ This is a story of saints and spies, of anglers and pirates, traders and marauders - and of how their wild and daring journeys across the North Sea built the world we know. When the Roman Empire retreated, northern Europe was a barbarian outpost at the very edge of everything. A thousand years later, it was the heart of global empires and the home of science, art, enlightenment and money. We owe this transformation to the tides and storms of the North Sea. Boats carried food and raw materials, but also new ideas and information. The seafarers raided, ruined and killed, but they also settled and coupled. With them they brought new tastes and technologies - books, science, clothes, paintings and machines. Drawing on an astonishing breadth of learning and packed with human stories and revelations, this is the epic drama of how we came to be who we are.

_____ 'A closely-researched and fascinating characterisation of the richness of life and the underestimated interconnections of the peoples all around the medieval and early modern North Sea' Chris Wickham, author of *The Inheritance of Rome: A History of Europe from 400 to 1000* 'Elegant writing and extraordinary scholarship . . . Miraculous' Hugh Aldersey-Williams, author of *Periodic Tales and Anatomies* 'Bristling, wide-ranged and big-themed . . . at its most meaningful, history involves a good deal of art and storytelling. "Faces of the North established Ragnar 'RAX' Axelsson as one of the leading documentary photographers of our time. This long-awaited second edition--the result of more than 30 years of documenting the lives of hunters, fishermen, and farmers in the North--doubles the original selection with previously unpublished photographs from RAX's collection, alongside personal accounts of the journeys which led to their creation. The result is a rare testament to cultures across Iceland, the Faroes, and Greenland; to worlds and ways of life that, if not for the photographs, have all but vanished. Raised on an isolated farm in southern Iceland, Ragnar Axelsson (born 1958) became captivated early on by the brutal beauty of the North Atlantic and the delicate interactions between its inhabitants and their environment. Born of that fascination, Faces of the North, first published in 2004, established Axelsson as one of the leading documentary photographers of our time. Long out of print, Faces of the North is now republished in an edition that echoes the format of Axelsson's latest publications, Last Days of the Arctic and Behind the Mountains. In the 2004 edition of Faces of the North, Axelsson collected the images of farmers, hunters and fishermen in the Arctic and the Atlantic that he became best known for; in the 2016 edition, his oeuvre comes full circle, as he looks back upon the foundation of his photographic passion and career."--Publisher's website. Northern Europe and North America have dominated the world stage for more than two centuries. Using a wide range of sources, this book provides the first coherent account from a multi-national perspective of

the ideas and perceptions that, from the Renaissance onwards, fuelled the North's rise to prominence, and enabled it to rival the traditional cultural and political hegemony of the South. This includes not only the fascinating conquest of the polar regions, but also the religious upheaval of the Reformation, the changing view of nature engendered by Romanticism, and, not least, the revival of ancient Nordic and Celtic culture. Finally, the book offers an indispensable historical background to current events in the Far North, where the past and the future meet in a complex web of dramatic environmental concerns, the exploitation of natural resources, and the strategies of politics and commerce. *Castles of the North* celebrates the magnificent history of Canada's grand hotels, buildings that are among the country's most recognized and storied landmarks. In Quebec City, the Chateau Frontenac defines the skyline; in the Rockies, the Banff Springs entices visitors to dramatic scenery. Though overshadowed by towering bank buildings, the Royal York in Toronto still holds its own. Some of Canada's earliest tourist draws, the historic grand hotels were also at the social heart of emerging cities from coast to coast. North is the point we look for on a map to orient ourselves. It is also the direction taken throughout history by the adventurous, the curious, the solitary, and the foolhardy. Based in the North himself, Peter Davidson, in *The Idea of North*, explores the very concept of "north" through its many manifestations in painting, legend, and literature. Tracing a northbound route from rural England—whose mild climate keeps it from being truly northern—to the wind-shorn highlands of Scotland, then through Scandinavia and into the desolate, icebound Arctic Circle, Davidson takes the reader on a journey from the heart

of society to its most far-flung outposts. But we never fully leave civilization behind; rather, it is our companion on his alluring ramble through the north in art and story. Davidson presents a north that is haunted by Moomintrolls and the ghosts of long-lost Arctic explorers but at the same time, somehow, home to the fragile beauty of a Baltic midsummer evening. He sets the Icelandic Sagas, Nabokov's snowy fictional kingdom of Zembla, and Hans Christian Andersen's cryptic, forbidding Snow Queen alongside the works of such artists as Eric Ravilious, Ian Hamilton Finlay, and Andy Goldsworthy, demonstrating how each illuminates a different facet of humanity's relationship to the earth's most dangerous and austere terrain. Through the lens of Davidson's easy erudition and astonishing range of reference, we come to see that the north is more a goal than a place, receding always before us, just over the horizon, past the last town, off the edge of the map. True north may be unreachable, but *The Idea of North* brings intrepid readers closer than ever before. Behold the man: stinking, drunk, and brutal. Henry Drax is a harpooner on the *Volunteer*, a Yorkshire whaler bound for the rich hunting waters of the arctic circle. Also aboard for the first time is Patrick Sumner, an ex-army surgeon with a shattered reputation, no money, and no better option than to sail as the ship's medic on this violent, filthy, and ill-fated voyage. In India, during the Siege of Delhi, Sumner thought he had experienced the depths to which man can stoop. He had hoped to find temporary respite on the *Volunteer*, but rest proves impossible with Drax on board. The discovery of something evil in the hold rouses Sumner to action. And as the confrontation between the two men plays out amid the freezing darkness of an arctic winter, the fateful question arises: who will survive until spring? With savage, unstoppable momentum and the blackest wit, Ian McGuire's *The North Water* weaves a superlative story of humanity under the most extreme conditions. Global seawater levels are rising and the low-lying coasts of the North Sea basin are amongst the most vulnerable in Europe. In our current moment of environmental crisis, the North Sea coasts are literary arenas in which the challenges and concerns of the Anthropocene are being played out. This book shows how the fragile landscapes around the North Sea have served as bellwethers for environmental concern both now and in the recent past. It looks at literary sources drawn from the countries around the North Sea (Denmark, Germany, the Netherlands, and England) from the mid-nineteenth century onwards, taking them out of their established national and cultural contexts and reframing them in the light of human concern with fast-changing and hazardous environments. The six chapters serve as literary case studies that highlight

memories of flood disaster and recovery, attempts to engineer the landscape into submission, perceptions of the landscape as both local and global, and the imagination of the future of our planet. This approach, which combines environmental history and ecocriticism, shows the importance of cultural artefacts in understandings of, and responses to, environmental change, and advocates for the importance of literary studies in the environmental humanities. This book will be of great interest to students and scholars of the Environmental Humanities, including Eco-criticism and Environmental History, as well as anyone studying literature from the Germanic philologies. It has been generations since the Northlands have seen a hero worthy of the title. Many have made the claim, but few have lived to defend it. Timid, weak, and bullied, Wulfric is as unlikely a candidate as there could be. A chance encounter with an ancient and mysterious object awakens a latent gift, and Wulfric's life changes course. Against a backdrop of war, tragedy, and an enemy whose hatred for him knows no bounds, Wulfric will be forged from a young boy, into the Wolf of the North. All the weeds commonly found in the North Central Region, as well as a good many that are less common, are illustrated and described in this book. Detailed pictures have been given for most of the weeds, and wherever possible in the descriptions common terms have been substituted for technical ones. People with a minimum of botanical knowledge should therefore be able to identify almost every weed they are likely to find. A weed is defined as a plant not intentionally sown, whose undesirable qualities outweigh its good points. Includes: weed descriptions; keys for identifying weeds; glossary; index to species; and index to families. B&W

drawings. Science in the Arctic changed dramatically over the course of the nineteenth century, when early, scattered attempts in the region to gather knowledge about all aspects of the natural world transitioned to a more unified Arctic science under the First International Polar Year in 1882. The IPY brought together researchers from multiple countries with the aim of undertaking systematic and coordinated experiments and observations in the Arctic and Antarctic. Harsh conditions, intense isolation, and acute danger inevitably impacted the making and communicating of scientific knowledge. At the same time, changes in ideas about what it meant to be an authoritative observer of natural phenomena were linked to tensions in imperial ambitions, national identities, and international collaborations of the IPY. Through a focused study of travel narratives in the British, Danish, Canadian, and American contexts, Nanna Katrine Lüders Kaaalund uncovers not only the transnational nature of Arctic exploration, but also how the publication and reception of literature about it shaped an extreme environment, its explorers, and their scientific practices. She reveals how, far beyond the metropole—in the vast area we understand today as the North American and Greenlandic Arctic—explorations and the narratives that followed ultimately influenced the production of field science in the nineteenth century. Canada's master storyteller returns to the North to chronicle the extraordinary stories of five inspiring and controversial characters. Canada's master storyteller returns to the North to bring history to life. Prisoners of the North tells the extraordinary stories of five inspiring and controversial characters whose adventures in Canada's frozen wilderness are no less fascinating today than they were a

hundred years ago. We meet Joseph Boyle, the self-made millionaire gold prospector from Woodstock, Ontario, who went off to the Great War with the word “Yukon” inscribed on his shoulder straps, and solid-gold maple-leaf lapel badges. There he survived several scrapes with rogue Bolsheviks, earned the admiration of Trotsky, saved Romania from the advancing Germans, and entered into a passionate affair with its queen. We meet Vilhjalmur Steffansson, who knew every corner of the Canadian North better than any explorer. His claim to have discovered a tribe of “Blond Eskimos” brought him world-wide attention and landed him in controversy that would dog him the rest of his life. There is John Hornby, the eccentric public-school Englishman so enthralled with the Barren Grounds where he lived that he finally starved to death there with the two young men who had joined his adventures. Berton gives us a riveting account of the contradictory life of Robert Service — a world-famous poet whose self-effacement was completely at odds with his public persona. And we meet the extraordinary Lady Jane Franklin, who belied every last stereotype about Victorian women with her immense determination, energy, and sense of adventure. She travelled more widely than even her famous explorer husband, Sir John. And her indefatigable efforts to find him after his disappearance were legendary. A Yukoner himself, Berton weaves these tales of courage, fortitude, and reckless lust for adventure with a love for Canada’s harsh north. With his sharp eye for detail and faultless ear for a good story, Pierre Berton shows once again why he is Canada’s favourite historian. Between 1958 and 1970, a distinctive movement for racial justice emerged from unique circumstances in Milwaukee. A series of local leaders

inspired growing numbers of people to participate in campaigns against employment and housing discrimination, segregated public schools, the membership of public officials in discriminatory organizations, welfare cuts, and police brutality. The Milwaukee movement culminated in the dramatic and sometimes violent 1967 open housing campaign. A white Catholic priest, James Groppi, led the NAACP Youth Council and Commandos in a militant struggle that lasted for 200 consecutive nights and provoked the ire of thousands of white residents. After working-class mobs attacked demonstrators, some called Milwaukee "the Selma of the North." Others believed the housing campaign represented the last stand for a nonviolent, interracial, church-based movement. Patrick Jones tells a powerful and dramatic story that is important for its insights into civil rights history: the debate over nonviolence and armed self-defense, the meaning of Black Power, the relationship between local and national movements, and the dynamic between southern and northern activism. Jones offers a valuable contribution to movement history in the urban North that also adds a vital piece to the national story.
