India is now on the verge of acquiring a triad of nuclear delivery systems. Its increasing nuclear profile has also stirred a debate on its stated nuclear doctrine involving principles of no-first use and massive retaliation. This Letort Paper examines changes in India's nuclear trajectory, the accompanying doctrinal debate, and its nonproliferation policies in the backdrop of the current regional and international context. The implications of this for the United States and its policy in the Asia-Pacific region are also discussed"--Publisher's web site.

**Zero to One** Aug 02 2020 #1 NEW YORK TIMES BESTSELLER • “This book delivers completely new and refreshing ideas on how to create value in the world.”—Mark Zuckerberg, CEO of Meta “Peter Thiel has built multiple breakthrough companies, and Zero to One shows how.”—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In Zero to One, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we’re too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won’t make a search engine. Tomorrow’s champions will not win by competing ruthlessly in today’s marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

**Two Little Soldiers** Sep 03 2020 Jean and Luc are two best friends serving in the army. Life as a soldier is unforgiving, but every Sunday provides a ray of hope for the two soldiers as they walk down the Seine river and lunch in a forest that

reminds them of home. The idyllic countryside of Champioux is, to them, a little heaven. Yet when a milkmaid catches one of the soldier's eyes, the two friends' ordered world begins to unravel. A simple tale of friendship, love, and loss, "Two Little Soldiers" is a masterful portrayal of Maupassant's knowledge of the human soul and condition. Perfect for readers of Hemingway, this short story is tinged with the tragedy of war seen through the lives of everyday soldiers. Guy de Maupassant (1850-1893) was a famous French writer, often referred to as the father of the short story. A prolific writer, his best known works include "Bel-Ami", "Une Vie" and "The Necklace", alongside some 300 short stories, travel books, and poetry. A master of style and dramatic narrative, Maupassant's stories are drawn to themes of war, the working class, and the human condition. One of his greatest influences was Gustave Flaubert, who introduced him to some of the central names of the time such as Emile Zola, Ivan Turgenev, and Henry James.

**Made in India** Sep 22 2019 There's more to Milind Soman than meets the eye (although, as his legions of female fans will agree, what meets the eye is pretty delish). Combining in himself the passion of an entrepreneur, the mind of a nerd, the discipline of an athlete, the curiosity of an explorer, the heart of a patriot and the soul of a philosopher, Milind has made the stunning-and apparently seamless-transition from champion swimmer to supermodel to actor to extreme sportsperson to women's fitness activist, enabler and proselytiser, all in one lifetime. How does he do it? What makes him tick? On the twenty-fifth anniversary of 'Made in India', the breakout pop music video of the 1990s that captured the apna-time-aagaya zeitgeist of post-liberalization India and made him the nation's darling across genders and generations, Milind talks about his fascinating life-controversies, relationships, the breaking of vicious habits like smoking, alcohol, rage, and more-in a freewheeling, bare-all (easy, ladies-we're talking soul-wise!) memoir. Co-authored with bestselling author Roopa Pai, MADE IN INDIA is a rare glimpse into the mind and heart of a very unusual man that will leave you thoughtful, awed and inspired.

*Karnali Blues* Aug 26 2022 *Karnali Blues*, by Buddhisagar, is the most widely read Nepali novel to have appeared in the last twenty years. As it recounts the evolution of a father-son relationship—a son's search for approval, a father's small acts of kindness and forgiveness, a son's fears for his father's dignity as his fortunes and faculties begin to fail—the reader is deeply drawn into young Brisha Bahadur's world. His father is kind and idealistic; his mother, though she is kind too, is often frustrated and irascible. The characters in this book are some of the most carefully drawn and authentic in all of Nepali literature. In a backwater district of a country about to undergo radical social, political and cultural change, Brisha's dreams, his games and his mischief, his loves, his hopes and his fears come alive. Translated from the Nepali by Michael Hutt, this highly original piece of work, with the simplicity of its language and its emotional range, holds the power to take your breath away. Its principal themes—the love between a son and his father, the joys and sorrows of childhood, the daily struggle for survival—are universal, and will resonate with readers the world over.

*Hindu Kush-Himalaya Watersheds Downhill: Landscape Ecology and Conservation Perspectives* Jan 19 2022 This book describes the myriad components of the Hindu Kush-Himalaya (HKH) region. The contributors elaborate on challenges, failures, and successes in efforts to conserve the HKH, its indigenous plants and animals, and the watershed that runs from the very roof of the planet via world-rivers to marine estuaries, supporting a human population of some two billion people. Readers will learn how the landforms, animal species and humans of this globally fascinating region are connected, and understand why runoff from snow and ice in the world's tallest mountains is vital to inhabitants far downstream. The book comprises forty-five chapters organized in five parts. The first section, Landscapes, introduces the mountainous watersheds of the HKH, its weather systems, forests, and the 18 major rivers whose headwaters are here. The second part explores concepts, cultures, and religions, including ethnobiology and indigenous regimes, two thousand years of religious tradition, and the history of scientific and research expeditions. Part Three discusses policy, wildlife conservation management, habitat and biodiversity data, as well as the interaction of animals and humans. The fourth part examines the consequences of development and globalization, from hydrodams, to roads and railroads, to poaching and illegal wildlife trade. This section includes studies of animal species including river dolphins, woodpeckers and hornbills, langurs, snow leopards and more. The concluding section offers perspectives and templates for conservation, sustainability and stability in the HKH, including citizen-science projects and a future challenged by climate change, growing human population, and global conservation decay. A large assemblage of field and landscape photos, combined with eye-witness accounts, presents a 50-year local and wider perspective on the HKH. Also included are advanced digital topics: data sharing, open access, metadata, web portal databases, geographic information systems (GIS) software and machine learning, and data mining concepts all relevant to a modern scientific understanding and sustainable management of the Hindu Kush-Himalaya region. This work is written for scholars, landscape ecologists, naturalists and researchers alike, and it can be especially well-suited for those readers who want to learn in a more holistic fashion about the latest conservation issues.

**Order in Paradox** Oct 04 2020 David H. Holmberg here examines the social forms, ritual practices, and history of a western Tamang community of Himalayan Nepal. Exploring the central question of ritual complexity, *Order in Paradox* demonstrates how a religious system that contains Buddhist, shamanic, and sacrificial practices may be understood as a whole. Holmberg begins by recounting the history of the Tamang and reexamining the meaning of caste, tribe, and ethnicity in greater Nepal. Holmberg reveals how cultural patterns thought to be uniquely Tamang reflect this people's development of an "involved" "tribal" form of Buddhist religious expression—an evolution he interprets as a result in part of the unification of the Nepalese state. Holmberg then offers descriptions of the culture, mythic imagination, and ritual field of the Tamang. Exploring both structural and historical dimensions of Tamang rituals, Holmberg shows how they form a system linked to a cultural logic of exchange upon which Tamang society is built. He also sheds light on the relationship between gender and ritual, considering in detail the close association between femaleness and the shamanic in Tamang culture.
