in physics we want to explain why objects move around the way they do however it would be hard to explain motion if we didn't know how to describe motion so first in the topics one dimensional motion and two dimensional motion we'll learn how to precisely describe the motion of objects and predict their motion for some special cases welcome to the physics library physics is the study of matter motion energy and force here you can browse videos articles and exercises by topic we keep the library up to date so you may find new or improved material here over time one dimensional motion introduction to physics displacement velocity and time acceleration jan 11 2023 physics science that deals with the structure of matter and the interactions between the fundamental constituents of the observable universe in the broadest sense physics from the greek physikos is concerned with all aspects of nature on both the macroscopic and submicroscopic levels its scope of study encompasses not only the behaviour of objects under the action of given forces but also the nature and origin of gravitational electromagnetic and physics is a branch of science it is one of the most fundamental scientific disciplines the main goal of physics is to explain how things move in space and time and understand how the universe behaves it studies matter forces and their effects the word physics comes from the greek word φυσικη meaning nature jan 26 2023 physics 50 years ago physicists found the speed of light in the 1970s scientists set a new maximum speed limit for light fifty years later they continue putting light through its paces by in the field of physics which you could view maybe right after mathematics as the purest of the sciences so you have math which is very pure and then on that foundation of math you have physics and physics really does try to use that mathematics along with some core ideas to explain the phenomena all the phenomena of the universe physics is the natural science that studies matter its fundamental constituents its motion and behavior through space and time and the related entities of energy and force physics is one of the most fundamental scientific disciplines with its main goal being to understand how the universe behaves physics 1 a science that deals with matter and energy and their actions upon each other in the fields of mechanics heat light electricity sound and the atomic nucleus 2 physical starting with the emergence of quantum mechanics the world of physics has been divided between classical and quantum physics classical physics deals with the motions of objects we
