After U.S. Deputy Marshal Custis Long blasts a killer to hell in an epic gunfight, he seeks respite in Hell's Half Acre. Notorious beyond its size, Fort Worth's "Acre" features bullet-riddled corpses and scores of barely dressed women, drunks, gamblers, tinhorns, outlaws, cowboys and tradesmen. What better place for a marshal to vacation? But, sooner than later, the bad guys in Hell's Half Acre need reminding that there's no rest for the wicked—or for the lawman

known as Longarm who blows them to blazes. The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be. This book presents recent developments and results found by participants of the Third International Conference on the Dynamics of Information

Systems, which took place at the University of Florida, Gainesville FL, USA on February 16-18, 2011. The purpose of this conference was to bring together scientists and engineers from industry, government, and universities to exchange knowledge and results in a broad range of topics relevant to the theory and practice of the dynamics of information systems. Dynamics of Information plays an increasingly critical role in our society. The influence of information on social, biological, genetic, and military systems must be better understood to achieve large advances in the capability and understanding of these systems. Applications are widespread and include: research in evolutionary theory, optimization of information workflow, military applications, climate networks, collision work, and much more. Hershey broke ground to construct his new chocolate factory in 1903, many questioned the wisdom of building in the middle of a cornfield. With his factory

wedged between the Philadelphia & Reading Railroad tracks and the Berks & Dauphin Turnpike, Hershey set out to create a first-rate street railway system. The Hershey Transit Company existed many years after the trolley industry declined in most areas of the United States. It was the chief mode of travel for the chocolate factory workers, vital to dairy farmers for transport of fresh milk to the factory, and essential to students of the Hershey Industrial School housed in surrounding farms. On the weekends, the transit system brought people from outlying areas into Hershey, Pennsylvania, to enjoy the theater or the famous Hershey Park for employee picnics, family outings, or special occasions. Hershey Transit documents one of the best-known and well-kept streetcar systems, started by Milton S. Hershey and operated from 1904 to 1946. The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components. The innovative Teacher Edition with CD allows a teacher to approach the teaching and learning of Science with confidence as it includes pages from the student book with wrap around teacher notes including answers, hints, strategies and teaching and

assessment advice. The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique. Belle longs for something more from her humdrum life but finds more than she bargains for. Covers receipts and expenditures of appropriations and other funds. In recent decades, governments have promoted social enterprise as a means to address welfare and tackle disadvantage. Early academic work on social enterprises reflected this development and engaged with their ability to deliver and create jobs, work

towards remedial environmental goals, and address a range of societal challenges. More recently, researchers have started to investigate the broader potential of social enterprise for the wellbeing of people and the planet. In this context, this book aims to answer the question: In what ways can social enterprises improve the health and wellbeing of individuals and communities? The chapters in this edited collection take different perspectives on assessing how social enterprises address disadvantage and deliver health and wellbeing impacts. Drawing on evidence from international research studies, *Social Enterprise, Health, and Wellbeing: Theory, Methods, and Practice* presents the 'first wave' of innovative research on this topic and provides a platform of evidence to inspire the next generation of scholarly and policy interest. Drawing on the cutting edge of interdisciplinary research in the field, this book will be of interest to researchers, academics, policymakers, and students in the fields of entrepreneurship, public and social policy, community development, public health, human geography, and urban planning.
