algebra is a branch of
mathematics that deals with
symbols and the arithmetic
operations across these
symbols these symbols do not
have any fixed values and are

just like a puzzle where we
start with something like $x^2 + 4$
and we want to end up with

something like $x^2 + 6$ but instead
of saying obviously $x^2 + 6$ use this
neat step by step approach
work out what to remove to get
 x^2 remove it by doing the
opposite adding is the opposite
of subtracting do that to both
sides
