International Meeting in Sheffield, England, in August 1988."--Preface. - Includes bibliographical references (p. [165]-170) and indexes. Kaspar Limpert was born 18 June 1808 in Rossbach, Germany. His father was Adam Siegmund Limpert (1742-1827). He emigrated in 1833. He married Cynthia Rarey of Groveport, Ohio in 1842. They had two children, William Rarey (1845-1895) and Elizabeth Frances (1849-1937). Kaspar died in 1879. Includes letters written by Kaspar to friends and relatives while he was still in Germany and after settling in Groveport, Ohio. This second edition builds on the first, while making significant changes that reflect new trends in the study of American immigration history. The field was first centrally defined in the mid-twentieth century by the study of immigrants from Europe. Asians and Latinos were not considered "immigrants"--People who settled permanently in the United States. They were considered "birds of passage"--people who did not experience the same social processes of incorporation and assimilation as did Europeans. As immigration from Asia and Latin America to the United States surged in the last third of the twentieth century, scholars began to pay more attention to their experiences, both historical and contemporary. A much more diverse and inclusive portrait of the American immigration experience has emerged. Ettore Majorana was born in the Sicilian city of Catania. He joined Enrico Fermi's 'Via Panisperna boys' at an early age and was part of the team who first discovered the slow neutrons (the research that would lead to the nuclear reactor and eventually, the atomic bomb). Enrico Fermi considered him one of brightest scientists, comparable to*

*Galileo and Newton. On March 25, 1938, Ettore Majorana mysteriously disappeared at 31. When the author moved to the University of Catania, Sicily, from Milan University back in 1968, he soon discovered important documents pertaining to Majorana's life and works. Together with his own investigative materials and full cooperation from Majorana's family members, he published a book on his disappearance in Italian (after having helped the famous Italian writer, Leonardo Sciascia, to write down his known Essay, by supplying him with copy of some of the discovered documents). Recami's book was entitled *Il Caso Majorana — Epistolario, Documenti, Testimonianze* and when it first appeared in Italy, it drew interest from all the major newspapers, publications and TVs & broadcast media. Even after his disappearance, Ettore Majorana's name appeared in many areas of frontier physics research, ranging from elementary particle physics to applied condensed matter, to mathematical physics, and more. His long lasting contributions is a testimony of his brilliance and farsightedness and has continued to draw interest from scientists not only in Italy, but from all over world until today. An English version of the original is very appropriate at this juncture, when more and more scholars in the world are getting convinced that he was really a genius 'like Galileo and Newton'. This book traces the extraordinary life of Ettore Majorana — through his letters, documents and testimonies from his friends and family members. What makes this book more fascinating (as a detective-story too) is his mysterious disappearance at young age. This book, therefore, is both a biography and a mystery book. The eighteen essays in this volume cover a wide range of material and reevaluate women's studies and Middle Eastern studies, Muslim women and the Shari'a courts, the Ottoman household, Dhimmi communities, children and family law, morality, and violence. The author of *Genealogy for the First Time* offers a colorful guide to preserving a family's heritage using scrapbooks, offering instructions for creating beautiful mementos to family history that can be passed on to future generations. A unique analysis of the moral and social dimensions of microeconomic behaviour in developing countries, this book calls into question standard notions of rationality and many of the assumptions of neo-classical economics, and shows how these are inappropriate in communities with widespread disparity in incomes. This book will prove to be essential for students studying development economics. The rediscovery of Enochic Judaism as an ancient movement of dissent within Second Temple Judaism, a

*movement centered on neither temple nor torah, is a major achievement of contemporary research. After being marginalized, ancient Enoch texts have reemerged as a significant component of the Dead Sea Scrolls library unearthed at Qumran. Enoch and Qumran Origins is the first comprehensive treatment of the complex and forgotten relations between the Qumran community and the Jewish group behind the pseudepigraphal literature of Enoch. The contributors demonstrate that the roots of the Qumran community are to be found in the tradition of the Enoch group rather than that of the Jerusalem priesthood. Framed by Gabriele Boccaccini's introduction and James Charlesworth's conclusion, this book examines the hypotheses of five particularly eminent scholars, resulting in an engaging and substantive discussion among forty-seven specialists from nine countries. The exceptional array of essays from leading international scholars in Second Temple Judaism and Christian origins makes Enoch and Qumran Origins a sine qua non for serious students of this period. In 1720, Antonio Stradivari crafted an exquisite work of art—a cello known as the Piatti. Over the next three centuries of its life, the Piatti cello left its birthplace of Cremona, Italy, and resided in Spain, Ireland, England, Italy, Germany, and the United States. In 1978, the Piatti became the musical soul mate of world-renowned cellist Carlos Prieto, with whom it has given concerts around the world. In this delightful book, Mr. Prieto recounts the adventurous life of his beloved "Cello Prieto," tracing its history through each of its previous owners from Stradivari in 1720 to himself. He then describes his noteworthy experiences of playing the Piatti cello, with which he has premiered some eighty compositions. In this part of their mutual story, Prieto gives a concise summary of his own remarkable career and his relationships with many illustrious personalities, including Igor Stravinsky, Dmitry Shostakovich, Pablo Casals, Mstislav Rostropovich, Yo-Yo Ma, and Gabriel García Márquez. A new epilogue, in which he describes recent concert tours in Moscow, Siberia, and China and briefer visits to South Korea, Taiwan, and Venezuela, as well as recent recitals with Yo-Yo Ma, brings the story up to 2009. To make the story of his cello complete, Mr. Prieto also provides a brief history of violin making and a succinct review of cello music from Stradivari to the present. He highlights the work of composers from Latin America, Spain, and Portugal, for whose music he has long*

been an advocate and principal performer. The print edition of this book includes a CD of fourteen recordings by Carlos Prieto, including works by J. S. Bach, Dmitry Shostakovich, Astor Piazzolla, and Eugenio Toussaint. Explains how to trace the past through public records and discusses the importance of oral history in the African American tradition

Excerpt from *Memorials of the Urlin Family: Compiled From Original Unpublished Documents* My father, the late Richard Denny Urlin (formerly Urling), who altered his name after being called to the Bar in 1852, considered that form to be the earlier and more correct spelling of the name, and his theory has been confirmed by the discovery of fresh facts relating to the Urlin families, which have been made since his death by Mr. Perceval Lucas. My father did not know of the existence of an earlier and more widely extended branch of the family, established for some centuries in the parishes of Upton, Stoke Poges, and Iver, in Buckinghamshire, and in West Drayton and Harmondsworth, in Middlesex, which has been brought to light by means of researches into the Wills and Registers pertaining to those counties. He discovered the family of Simon Urlin, of Ampthill, in Bedfordshire, and supposed the descent of his own branch to be from that stock. The connection with this family has not, however, been established. About the Publisher

John Davidson came to the North Carolina back country circa 1751 as a young man, with his sister and widowed mother. Typical of Scots-Irish settlers, they arrived with little more than basic farming tools, determined to make it on their own terms. Davidson worked hard, prospered, married well and built a plantation on the Catawba River he called Rural Hill. The Davidson's were loyal British citizens who paid their taxes and participated in colonial government. When the Crown's overbearing authority interfered, independence became paramount and Davidson and his neighbors became soldiers in the Revolutionary War. After the war Davidson managed his plantation, created shad fisheries, helped develop the local iron industry with his sons-in-law and was an early planter of cotton. His sons and grandsons, along with their slave families, continuously increased and improved the acreage and became early practitioners of scientific farming. Drawing on public documents, family papers and slave records, this history describes how a fiercely independent family grew their lands and fortunes into a lasting legacy.

**REDEFINING THE PRACTICE OF ARCHITECTURE CLIENT • BUSINESS • DELIVERY • SERVICES** This second companion volume to the Thirteenth Edition of *The Architect's Handbook of Professional Practice* brings architects and others working in the architectural community up to date on the current state of the practice, from important issues affecting day-to-day operations and emerging business trends to the latest AIA

*contract documents. The three sections of this easy-to-use reference present accessible, field-tested knowledge on running a successful business: Practice reports—Read real-world reports from practitioners in the field, including a survey of client decision makers in the health care sector describing how these clients perceive services performed by architects. Learn from firms that are striking out in new directions by blending expanded services with core design offerings. Find out how to attract new business by making your firm more environmentally conscious, and see how the power of digital technology can transform the traditionally segmented project delivery process. Practice topics—Add practical techniques for uncovering client and user needs to your practice arsenal. Discover the distinctive aspects and challenges of small projects in small practice settings. Enhance your knowledge of managing multiple offices, keeping key staff, and maintaining the intent and quality of your project designs. Gain an understanding of expert witnesses and facility evaluation services. AIA contract documents—Find out what's new in the AIA documents program and update your files with an accompanying CD-ROM containing all existing, revised, and new AIA contract documents. "Home and family," for a woman of the nineteenth century, represented a sphere much broader than the term implies today. A woman's duties as sister and daughter continued, basically unchanged, even after she had assumed the roles of wife and mother. This created a female-centered kin network which went far beyond the fragile nuclear family, and which insured lifelong security in what men and women viewed as an essentially hostile world. The female family is vividly portrayed in True Sisterhood, where Marilyn*

*Ferris Motz examines the lives of white Protestant native-born American women living in Michigan between 1820 and 1920 and the kinship networks to which they belonged--networks that often extended east to New England and the Middle Atlantic states and westward as far as California. The University of Michigan's Bentley Library collections of the correspondence, diaries, photographs, and other documents of numerous family groups have provided the primary resources for this study of thirty extended families. Focusing on personal interaction within the family, Motz shows women playing an active role that is not suggested by observation of residence patterns, household composition, or legal distribution of authority. The book reveals women's use of language to maintain personal relationships, to persuade and manipulate, and to obtain support. Thus the power base of the woman, her informal networks based on personal interaction, persuasion, and sense of obligation, become visible. True Sisterhood shows that women's influence was not merely a fabrication of the literature of what has come to be termed the "cult of domesticity" but was a reality within many nineteenth-century homes. Deeds, surveys, and leases regarding land owned in Litchfield, Conn., by members of the Peck family, including William Peck (1685-1764), his son Timothy (1730-1772), his grandsons Philo (1752-1831) and Virgil (1768-1804), Philo's son Alfred (1779-1852), and Alfred's son James (1808-1895). The ABA Checklist for Family Heirs is a wonderful tool for anyone needing assistance in organizing information for heirs. The book, which comes complete with a CD of documents that can be modified according to one's needs, includes the following checklists: personal history; family history; insurance;*

*benefits for survivors; banking and savings; investments; real estate; debts; wills and trusts; and final wishes. Rebecca Krug argues that in the later Middle Ages, people defined themselves in terms of family relationships but increasingly saw their social circumstances as being connected to the written word. Complex family dynamics and social configurations motivated women to engage in text-based activities. Although not all or even the majority of women could read and write, it became natural for women to think of writing as a part of everyday life. Reading Families looks at the literate practice of two individual women, Margaret Paston and Margaret Beaufort, and of two communities in which women were central, the Norwich Lollards and the Bridgettines at Syon Abbey. The book begins with Paston's letters, which were written at her husband's request, and ends with devotional texts that describe the spiritual daughterhood of the Bridgettine readers. Scholars often assume that medieval women's participation in literate culture constituted a rejection of patriarchal authority. Krug maintains, however, that for most women learning to engage with the written word served as a practical response to social changes and was not necessarily a revolutionary act.*
