*Rebuild* Mar 05 2021 What happens when prominent brands: Send faulty products into the market? Defy governmental regulations? Back the wrong marketing message? Have management spats in public? Or simply fail to anticipate a major trend? Over the years, prominent brands in India across product categories, both home-grown and multinational, have tackled crises ? some unexpected and some self-inflicted, but each a defining factor in shaping a company's future. In a first-of-its-kind narrative, *Rebuild* brings together the stories behind some of India's biggest businesses that dealt with potential disaster and emerged on the other side ? either victorious or wiser. Digging deep into the crisis management strategies adopted by companies such as Coca-Cola, Unilever, Kingfisher, Tata Sons, Indian Premier League, Facebook, Uber, Nokia, Nestlé Maggi Noodles and several more, it analyses the steps that different organizations have taken to

minimize damage to their brand, and describes how (if at all) they recovered. Featuring interviews with top management executives as well as expert brand-watchers, *Rebuild* closely examines the circumstances that cause brands to falter ? faulty products, leadership changes, disastrous sales cycles and competition activity, among others ? and provides invaluable insights that may serve as cautionary tales for organizations, both small and large.

Million Cars for Billion People May 27 2020 Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite

of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.
