For the fan, the collector, and the historian, there is no greater source of reliable and accurate information. With lilting lullaby text and lovely illustrations, the New Books for Newborns stories are the perfect first books for new parents to share with their little ones right from the start! Start here. If only raising a child was that easy. It can be difficult in the first year to figure out what's just right for your baby. But with this new line of books—New Books for Newborns—story time is really that simple. Designed as the first books to start reading with your baby, these just-right stories hit all the right notes with soothing texts, lovely art, and, most importantly, stories meant for sharing any time of the day. Start here. Snuggle up. It's story time! This book celebrates a mother's love trumping even majestic mother nature...a mama's love is higher than a mountain and deeper than any stream. Tom is daydreaming of African Safaris while test-firing his new Electric Rifle. It works

too well and toasts a hole in his neighbor's dining room wall, prompting an outraged visit from the toastee-in-question. A quick application of cash settles ruffled feathers, and some unspecified safety features are added to the weapon, to prevent a recurrence of the accident. As luck would have it, a famous African Safari Master is in town, shopping for a new big game rifle. He hooks up with Tom and a new custom-built airship, the Black Hawk, is designed & constructed. Tom, Ned, Mr. Damon and the hunter, Mr. Durban, are off to the Dark Continent via steamship, in search of ivory and adventure. Danger encroaches at every turn, and Tom gets to use his new weapon to slay an amazing variety of beasts that swim, crawl, and stampede around him. Needless to say, the rifle is effective on smaller but no less dangerous creatures, too, and does fearful duty when the group is attacked by savage tribesmen. You can probably guess the outcome, but you'll have to read the story to be sure. The Mercedes 126 S-Class of 1979-1991 remains the most successful premium saloon in the company's history and is considered by many to be one of the best cars in the world. "You don't simply decide to buy an S-Class: it comes to you when fate has ordained that your life should take that course. The door closes with a reassuring clunk - and you have

arrived," said the sales brochure of the first real Sonderklasse, the W116. With over 300 colour photos and production histories and specifications for both Generation One and Two models, this is an essential resource for anyone with an interest in this timeless car. The book covers an overview of the key personalities who drove the development of this model; the initial 116 Sonderklasse and its subsequent evolution; the history and personality of each model and finally detailed analysis of the different engines - both petrol and diesel. This essential resource explores both the technical and social sides of how this legend was born and is superbly illustrated with 314 colour photographs. We're told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA's owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He's going to defeat technology's dominance over our lives

by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times.' -Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' -Rohan Wilson

"The Hack Mechanic") wandered waaaay outside of his German car comfort zone and blew the advance from his first book on a car that captivated him as an adolescent—a 1974 Lotus Europa Twin Cam Special. The car hadn't been on the road since 1979, had a seized engine, and was purchased sight-unseen, but it was complete and had only 24,000 miles on it. In the week after it arrived, Rob feverishly ripped out the drivetrain, but the project soon ran into molasses due to the fact that all options for rebuilding or replacing the low-production Lotus-Ford Twin Cam engine would've cost more than he'd paid for the car. It was six years before the car was running, during which Rob lost his job and changed careers, necessitating that if work on the Lotus proceeded at all, costs needed to be relentlessly contained. All of this was chronicled on Facebook in a series of posts titled "The Lotus Chronicles," in which Rob's friends and acquaintances—the Hack Mechanic faithful—chimed in on the process, offering advice, encouragement, ridicule, scorn, every Lucas joke known to man and woman, and insight on why Lotus really does stand for "lots of trouble, usually serious." The Lotus Chronicles

is a collection of those posts, woven together with sections providing context and perspective. It's about passion, perseverance, the balance between "doing it right" and getting 'er done, what it takes to drag a project across the finish line, and coming to finally understand an offhand comment a man made to Rob when he first saw that Europa when he was 13 years old: "A car like that, you can get SEX out of." This essential guide contains an easy-to-use and quick reference guide, invaluable to owners wishing to maintain or restore their Triumph. But

the 160 or so automobiles on display are only a small part of the shiny chrome treasures that form the Mercedes-Benz Classic vehicle collection. Another 1,000 historical models are 'parked' in secret places outside Stuttgart - these secret places are called the 'Holy Halls'. This collection is the treasure trove of the brand. It has existed since 1923 and offers a comprehensive overview of the model history of Mercedes-Benz. Cars with special technology and equipment are stored here, as are the silver arrows of Caracciola, Lang and Fangio, the Pope's carriages, the state cars of the young Federal Republic of Germany or Mercedes models that became collectors' items due to their prominent previous owners. Some of these exhibits are well protected and waiting in special wooden boxes for their next use at exhibitions, fairs, events or classic car races. Others stand next to each other as silent witnesses of the past. Each time a model is modified, the collection is extended by the last vehicle of the discontinued series, which experts believe will be one of tomorrow's classic cars. The 'Holy Halls' are not open to the public; enquiries from editorial offices and TV teams have often been rejected. But, during the years 2016 to 2018, almost all the vehicles of the Mercedes collection were

photographed. Thus, a unique photographic collection was created, the automobile history from more than ten decades; many of the previously unpublished photographs are exclusively available here in this book. In addition, Mercedes-Benz Classic agreed to open the 'Holy Halls' for an external photo team and provide information about the car models stored there. For the first time, it has been possible to produce a fascinating illustrated book with panoramic and detailed shots from the 'halls', and lively photo reports on cars that tell stories - from the first Benz battling motor car to the latest Formula 1 racing car. Equally thrilling are the stories of the unique specimens and prototypes that are stored in the 'Holy Halls': Mercedes models that never went into production are presented for the first time. The stories about the selected automobiles of the vehicle collection are supplemented by historical recordings from the Mercedes-Benz Classic archive.
