"Rolling My Eyes Repeatedly: The BuddaKats" by Eddie Alfaro The Hunger Games meets Hitchhikers Guide to the Galaxy in this breathless survival thriller. Lord of the Flies meets Philip K Dick. There are 22 candidates. There are 12 seats. The last interstellar colony ship is down to its final batch of humans after the robots in charge unhelpfully deleted the rest. But rebooting a species and training them for the arduous task of colonisation isn't easy – especially when the planet below is filled with monsters, the humans are more interested in asking questions than learning, and the robots are all programmed to kill each other. But the fate of humanity rests on creating a new civilization on the planet below, and there are twelve seats on the lander. Will manipulation or loyalty save the day? So much to read, so little time? This brief overview of Stiff tells you what you need to know—before or after you read Mary Roach's book. Crafted and edited with care, Worth Books set the standard for quality and give you the tools you need to be a well-informed reader. This short summary and analysis of Stiff: The Curious Lives of Human Cadavers by Mary Roach includes: Historical context Chapter-by-chapter summaries Profiles of the characters and places Important quotes Fascinating trivia Glossary of terms Supporting material to enhance your understanding of the original work About Stiff: The Curious Lives of Human Cadavers by Mary Roach: Acclaimed journalist Mary Roach's bestselling book Stiff offers an inside look through the through the weird world of human cadavers. This globe-spanning story is deeply informative, surprisingly funny, and occasionally disgusting. These “superheroes,” as Roach refers to them, brave high-speed car crashes, gunshots, decomposition in the sun, and other indignities all in the name of advancing science and making life better for the living. The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction. Beloved, best-selling science writer Mary Roach's “acutely entertaining, morbidly fascinating” (Susan Adams, Forbes) classic, now with a new epilogue. For two thousand years, cadavers – some willingly, some unwittingly – have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. “Delightful—though never disrespectful” (Les Simpson, Time Out New York), Stiff investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? “This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is.” —Tara Parker-Pope, Wall Street Journal “Gross, educational, and unexpectedly sidesplitting.” —Entertainment Weekly With her signature warmth, hilarity, and tendency to overshare, Leslie Gray Streeter gives us real talk about love, loss, grief, and healing in your own way that "will make you laugh and cry, sometimes on the same page" (James Patterson). Leslie Gray Streeter is not cut out for widowhood. She's not ready for hushed rooms and pitying looks. She is not ready to stand graveside, dabbing her eyes in a classy black hat. If she had her way she'd wear her favorite curve-hugging leopard print dress to Scott's funeral; he loved her in that dress! But, here she is, having lost her soulmate to a sudden heart attack, totally unsure of how to navigate her new widow lifestyle. ("New widow lifestyle." Sounds like something you'd find products for on daytime TV, like comfy track suits and compression socks. Wait, is a widow even allowed to make jokes?) Looking at widowhood through the prism of race, mixed marriage, and aging, Black Widow redefines the stages of grief, from coffin shopping to day-drinking, to being a grown-ass woman crying for your mommy, to breaking up and making up with God, to facing the fact that life goes on even after the death of the person you were supposed to live it with. While she stumbles toward an uncertain future as a single mother raising a baby with her own widowed mother (plot twist!), Leslie looks back on her love story with Scott, recounting their journey through racism, religious differences, and persistent confusion about what kugel is. Will she find the strength to finish the most important thing that she and Scott started? Tender, true, and endearingly hilarious, Black Widow is a story about the power of love, and how the only guide book for recovery is the one you write yourself. "Lace and Brass Knuckles: The BuddaKats" by Eddie Alfaro A New York Times / National Bestseller "America's funniest science writer" (Washington Post) Mary Roach explores the science of keeping human beings intact, awake, sane, uninfected, and uninfested in the bizarre and extreme circumstances of war. Grunt tackles the science behind some of a soldier's most challenging adversaries—panic, exhaustion, heat, noise—and introduces us to the scientists who seek to conquer them. Mary Roach dodges hostile fire with the U.S. Marine Corps Paintball Team as part of a study on hearing loss and survivability in combat. She visits the fashion design studio of U.S. Army Natick Labs and learns why a zipper is a problem for a sniper. She visits a repurposed movie studio where amputee actors help prepare Marine Corps medics for the shock and gore of combat wounds. At Camp Lemmonier, Djibouti, in east Africa, we learn how diarrhea can be a threat to national security. Roach samples caffeinated meat, sniffs an archival sample of a World War II stink bomb, and stays up all night with the crew tending the missiles on the nuclear submarine USS Tennessee. She answers questions not found in any other book on the military: Why is DARPA interested in ducks? How is a wedding gown like a bomb suit? Why are shrimp more dangerous to sailors than sharks? Take a tour of duty with Roach, and you'll never see our nation's defenders in the same way again. Witty, sophisticated, sassy, 631 Art hilarious comics, with adorable artwork. Finding humor in living, capturing the comedy and quirkiness. A full-color comic book. A collection of rollicking comics, rib-tickling funnies. Brutally honest, brilliantly weird comics exploring what it's like to live on this planet. "Tasty Poison: The BuddaKats" by Eddie Alfaro Hypernormal: The Carefully Constructed Fake Worldby Eddie Alfar INSTANT #1 NEW YORK TIMES BESTSELLER For the first time in seven years, Allie Brosh—beloved author and artist of the extraordinary #1 New York Times bestseller Hyperbole and a Half—returns with a new collection of comedic, autobiographical, and illustrated essays. Solutions and Other Problems includes humorous stories from Allie Brosh's childhood; the adventures of her very bad animals; merciless dissection of her own character flaws; incisive essays on grief, loneliness, and powerlessness; as well as reflections on the absurdity of modern life. This full-color, beautifully illustrated edition features all-new material with more than 1,600 pieces of art. Solutions and Other Problems marks the return of a beloved American humorist who has “the observational skills of a scientist, the creativity of an artist, and the wit of a comedian” (Bill Gates). Praise for Allie Brosh's Hyperbole and a Half: “Imagine if David Sedaris could draw....Enchanting.” —People “One of the best things I've ever read in my life.” —Marc Maron “Will make you laugh until you sob, even when Brosh describes her struggle with depression.” —Entertainment Weekly “I would gladly pay to sit in a room full of people reading this book, merely to share the laughter.” —The Philadelphia Inquirer “In a culture that encourages people to carry mental illness as a secret burden....Brosh's bracing honesty is a gift.” —Chicago Tribune From acclaimed, New York Times best-selling author Mary Roach comes the complete collection of her “My Planet” articles published in Reader's Digest. She was a hit columnist in the magazine, and this book features the articles she wrote in that time. Insightful and hilarious, Mary explores the ins and outs of the modern world: marriage, friends, family, food, technology, customer service, dental floss, and ants—she leaves no element of the American experience unchecked for its inherent paradoxes, pleasures, and foibles. On Cleanliness: Ed has crud vision, and I don't. I don't notice filth. Ed sees it everywhere. I am reasonably convinced that Ed can actually see bacteria. . . . He confessed he didn't like me using his bathrobe because I'd wear it while sitting on the toilet. “It's not like it goes in the water,” I protested, though if you counted the sash as part of the robe, this wasn't strictly true. On the Internet: The Internet is a boon for hypochondriacs like me. Right now, for instance, I'm feeling a shooting pain on the side of my neck. A Web search produces five matches, the first three for a condition called Arnold-Chiari Malformation. While my husband, Ed, reads over my shoulder, I recite symptoms from the list. “‘General clumsiness’ and ‘general imbalance.’” I say, as though announcing arrivals at the Marine Corps Ball. “‘Difficulty driving,’ ‘lack of taste,’ ‘difficulty feeling feet on ground.’” “Those aren't symptoms,” says Ed. “Those are your character flaws.” On Fashion: My husband recently made me try on a bikini. A bikini is not so much a garment as a cloth-based reminder that your parts have been migrating all these years. My waist, I realized that day in the dressing room, has completely disappeared beneath my rib cage, which now rests directly on my hips. I'm exhibiting continental drift in reverse. On Eating Healthy: So Ed and I were eating a lot of vegetables. Vegetables on pasta, vegetables on rice. This was extremely healthy, until you got to the part where Ed and I are found in the kitchen at 10 p.m., feeding on Froot Loops and tubes of cookie dough. The author presents a collection of ways to reap the proven human and corporate benefits of humor at work, organized by core business skill and founded on his own work as a business speaker and coach with the consulting company, Humor That Works. Remote Control Consciousness: A Tale of a Group of Characters Pondering the Meaning of Existenceby Eddie Alfar "The World's Funniest Bathroom Graffiti" series is being made into a movie and maybe a TV series. You're invited to read all volumes of "The World's Funniest Bathroom Graffiti". This volume concentrates on more disgusting (but funny) bathroom graffiti. Samples from the book are below. 1. My husband's scrotum's been swollen for the last few days but I'm keeping a close eye on it. 2. What if they gave an orgy and nobody came? 3. What's the best thing a woman can get out of a penis - the wrinkles! 4. Jesus took it on the palm 5. Count Dracula, your bloody Mary is ready 6. Stop screwing around, support your local brothel! "Humor is complex, and the author, Mitch Earleywine, does an exceptional job of covering the big bases of humor from a research perspective in a small space with a readable content. When I first picked up this book and began reading it, I was looking for depth. What I found was an overview and at the same time a very exciting way to provide an entr e into psychology-a vehicle for students to grab hold of topics central to psychology but studiedand researched in terms of modern themes, and particularly humor." --PsycCRITIQUES "I've just finished reading Humor 101 with great interest and admiration. The book combines psychological research and practicality beautifully and humorously." -- Bob Mankoff Cartoon Editor, The New Yorker Magazine "In lucid, cheerful prose, Earleywine offers up the impossible: an explanation of humor that is as thoughtful, fascinating, and entertaining as humor itself." Elisa Albert Author of ,The Book of Dahliaand How This Night is Different "Dr. Earleywine's witty insight on this topic will make you funny, happy, and wise. Mitch has that rare ability to clearly explain something that is mysterious as it is magical: the power of laughter. Read this book and laugh while you learn." Brett Siddell Sirius/XM Satellite Radio Personality "Dr. Earleywine has written the perfect guide to understanding humor. No one else has the unique combination of witty stage time, outstanding teaching expertise, and impressive scientific background. You'll love this book." Derrick Jackson Winner, Ultimate Laff-Down What makes something funny? How does humor impact health and psychological well-being? How can you incorporate humor into everyday life? A concise, reader-friendly introduction to an important but often underappreciated topic in modern psychology, Humor 101 explains the role of comedy, jokes, and wit in the sciences and discusses why they are so important to understand. Psychology professor Dr. Mitch Earleywine draws from his personal experiences in stand-up comedy to focus on how humor can regulate emotion, reduce anxiety and defuse tense situations, expose pretensions, build personal relationships, and much more. He irreverently debunks the pseudoscience on the topic of humor and leaves readers not only funnier, but better informed. The Psych 101 Series Short, reader-friendly introductions to cutting-edge topics in psychology. With key concepts, controversial topics, and fascinating accounts of up-to-the-minute research, The Psych 101 Series is a valuable resource for all students of psychology and anyone interested in the field. Pluto gets a call from Earth telling him he isn't a planet anymore, so he sets out on a journey through the solar system to find out why in this funny and fact-filled romp that's perfect for fans of The Scrambled States of America. Pluto loves being a planet. That is, until the day he gets a call from some Earth scientists telling him he isn't a planet anymore! You probably wanted to meet a real planet, huh? So, Pluto takes the reader on a hilarious and informative journey through the solar system to introduce the other planets and commiserate about his situation along the way. Younger readers will be so busy laughing over Pluto's interactions with the other planets, asteroids, moons, and even the sun, they won't even realize just how much they're learning about our solar system! A Kirkus Reviews Best Book of the Year The witty and exuberant New York Times bestselling author and record-setting Jeopardy! champion Ken Jennings relays the history of humor in “lively, insightful, and crawling with goofy factlings,” (Maria Semple, author of Where'd You Go Bernadette)—from fart jokes on clay Sumerian tablets to the latest Twitter gags and Facebook memes. Where once society's most coveted trait might have been strength or intelligence or honor, today, in a clear sign of evolution sliding off the trails, it is being funny. Yes, funniness. Consider: Super Bowl commercials don't try to sell you anymore; they try to make you laugh. Airline safety tutorials—those terrifying laminated cards about the possibilities of fire, explosion, depressurization, and drowning—have been replaced by joke-filled videos with multimillion-dollar budgets and dance routines. Thanks to social media, we now have a whole Twitterverse of amateur comedians riffing around the world at all hours of the day—and many of them even get popular enough online to go pro and take over TV. In his “smartly structured, soundly argued, and yes—pretty darn funny” (Booklist, starred review) Planet Funny, Ken Jennings explores this brave new comedic world and what it means—or doesn't—to be funny in it now. Tracing the evolution of humor from the caveman days to the bawdy middle-class antics of Chaucer to Monty Python's game-changing silliness to the fast-paced meta-humor of The Simpsons, Jennings explains how we built our humor-saturated modern age, where lots of us get our news from comedy shows and a comic figure can even be elected President of the United States purely on showmanship. “Fascinating, entertaining and—I'm being dead serious here—important” (A.J. Jacobs, author of The Year of Living Biblically), Planet Funny is a full taxonomy of what spawned and defines the modern sense of humor. WALL STREET JOURNAL, LOS ANGELES TIMES, AND USA TODAY BESTSELLER • Anyone—even you!—can learn how to harness the power of humor in business (and life), based on the popular class at Stanford's Graduate School of Business. Don't miss the authors' TED Talk, “Why great leaders take humor seriously,” online now. “The ultimate guide to using the magical power of funny as a tool for leadership and a force for good.”—Daniel H. Pink, #1 New York Times bestselling author of When and Drive We are living through a period of unprecedented uncertainty and upheaval in both our personal and professional lives. So it should come as a surprise to exactly no one that trust, human connection, and mental well-being are all on the decline. This may seem like no laughing matter. Yet, the research shows that humor and laughter are among the most valuable tools we have at our disposal for strengthening bonds and relationships, diffusing stress and tension, boosting resilience, and performing when the stakes are high. That's why Jennifer Aaker and Naomi Bagdonas teach the popular course Humor: Serious Business at the Stanford

Graduate School of Business, where they help some of the world’s most hard-driving, blazer-wearing business minds infuse more humor and levity into their work and lives. In *Humor, Seriously*, they draw on findings by behavioral scientists, world-class comedians, and inspiring business leaders to reveal how humor works and—more important—how you can use more of it, better. Aaker and Bagdonas unpack the theory and application of humor: what makes something funny, how to mine your life for material, and simple ways to identify and leverage your unique humor style. They show how to use humor to rebuild vital connections; appear more confident, competent, and authentic at work; and foster cultures where levity and creativity can thrive. President Dwight David Eisenhower once said, “A sense of humor is part of the art of leadership, of getting along with people, of getting things done.” If Dwight David Eisenhower, the second least naturally funny president (after Franklin Pierce), thought humor was necessary to win wars, build highways, and warn against the military-industrial complex, then you might consider learning it too. For forty years, David Sedaris has kept a diary in which he records everything that captures his attention-overheard comments, salacious gossip, soap opera plot twists, secrets confided by total strangers. These observations are the source code for his finest work, and through them he has honed his cunning, surprising sentences. Now, Sedaris shares his private writings with the world. Theft by Finding, the first of two volumes, is the story of how a drug-abusing dropout with a weakness for the International House of Pancakes and a chronic inability to hold down a real job became one of the funniest people on the planet. Written with a sharp eye and ear for the bizarre, the beautiful, and the uncomfortable, and with a generosity of spirit that even a misanthropic sense of humor can't fully disguise, *Theft By Finding* proves that Sedaris is one of our great modern observers. It's a potent reminder that when you're as perceptive and curious as Sedaris, there's no such thing as a boring day. "Out of the Loop: The BuddaKats" by Eddie Alfaro The best-selling author of *Stiff* and *Bonk* trains her considerable wit and curiosity on the human soul. "What happens when we die? Does the light just go out and that's that—the million-year nap? Or will some part of my personality, my me-ness persist? What will that feel like? What will I do all day? Is there a place to plug in my lap-top?" In an attempt to find out, Mary Roach brings her tireless curiosity to bear on an array of contemporary and historical soul-searchers: scientists, schemers, engineers, mediums, all trying to prove (or disprove) that life goes on after we die. Draws on medical case histories, scientific findings, and personal research by the author to separate myth from fact and debunk a vast array of parental edicts. I feel more attractive. Honestly, you are. It's the star damage. I CRAVE STAR DAMAGE. Coast-to-coast readers of more than 150 newspapers such as the Los Angeles Times, San Francisco Chronicle, Atlanta Constitution, Chicago Sun-Times, and Toronto Star share Fagan's view of this laugh-out-loud strip that deftly balances the tightrope of political correctness. *Pardon My Planet: Omigawd! I've Become My Mother!* represents the first collection of this uproarious cartoon that finds humor in all that makes us a little uncomfortable. Lee's razor wit is delivered through an array of seven recurring characters, each with their own off-kilter look at the world. In one panel, middle-aged suburbanites Dennis and Chloe learn from their Realtor that they may have found a home in their price range, but "unfortunately, there's a Scottish terrier named Rusty living in it." In another panel, while twentysomething roommates Jesse-Jane and Norris are dining out, Jesse-Jane asks the server how the chicken is prepared. The waiter dryly replies, "With no sugar-coating. We tell them right up front they're going to die." At times, the humor of *Pardon My Planet* is subtle but speaks to a deeper truth. Other times it is flat-out bizarre. This heady and hilarious collection captures it all, laying bare the annoyances and eccentricities of the inhabitants of our planet in this strip's unique and fresh way. This carefully edited collection has been designed and formatted to the highest digital standards and adjusted for readability on all devices. The first time I heard about Planet Choom, we'd been on Mars for almost a year. But life on the Mars station was grim, and since Earth was no longer an option (we may have blown it up), it was time to find a new home. That's how we ended up on Choom with the Zhuri. They're very smart. They also look like giant mosquitos. But that's not why it's so hard to live here. There's a lot that the Zhuri don't like: singing (just ask my sister, Ila), comedy (one joke got me sent to the principal's office), or any kind of emotion. The biggest problem, though? The Zhuri don't like us. And if humankind is going to survive, it's up to my family to change their minds. No pressure. A humor survival guide for ages 12 and up. "The Story of a Short Titled Long Sentence"by Eddie Alfaro Gone are the days when formality and manners are mandatory. Today, a person's communication skills and charisma are highly dependent in his sense of humor. It may sound crazy, but jokes and insults are effective ways to gain control of social situations, but they must also be used with responsibility. With this being said, there has got to be a reason why you want to learn insults, but remember that your reason should never be to make someone else feel miserable; at least not for a very long time. People use insults and jokes all the time. There are even social events arranged specifically so that people can throw insults at each other for entertainment. You may not necessarily be aiming to participate in such events, but insults can still be used to shut someone down. They can also lighten up dull and boring situations if used properly. A deeply moving collection of personal essays from John Green, the author of *The Fault in Our Stars* and *Turtles All the Way Down*. “The perfect book for right now.” –People “The Anthropocene Reviewed is essential to the human conversation.” –Library Journal, starred review *The Anthropocene* is the current geologic age, in which humans have profoundly reshaped the planet and its biodiversity. In this remarkable symphony of essays adapted and expanded from his groundbreaking podcast, bestselling author John Green reviews different facets of the human-centered planet on a five-star scale—from the QWERTY keyboard and sunsets to Canada geese and Penguins of Madagascar. Funny, complex, and rich with detail, the reviews chart the contradictions of contemporary humanity. As a species, we are both far too powerful and not nearly powerful enough, a paradox that came into sharp focus as we faced a global pandemic that both separated us and bound us together. John Green’s gift for storytelling shines throughout this masterful collection. *The Anthropocene Reviewed* is an open-hearted exploration of the paths we forge and an unironic celebration of falling in love with the world.
