**The Soul of a New  
Machine** Sep 24

2022 Offers a

behind-the-scenes

look at the high

technology

computer industry,

observing a crash

program to develop

a highly

complicated

machine and the

people involved in

this competitive

business

**High Luminosity  
Large Hadron**

**Collider, The: The**

**New Machine For**

**Illuminating The  
Mysteries Of**

**Universe** Jun 28

2020 This book

provides a broad

introduction to the

physics and  
technology of the  
High Luminosity  
Large Hadron  
Collider (HL-LHC).

This new

configuration of the

LHC is one of the

major accelerator

projects for the

next 20 years and

will give new life to

the LHC after its

first 15-year

operation. Not only

will it allow more

precise

measurements of

the Higgs boson

and of any new

particles that might

be discovered in the

next LHC run, but

also extend the

mass limit reach for

detecting new

particles. The HL-

LHC is based on the

innovative

accelerator magnet

technologies

capable of

generating 11-13

Tesla fields, with

effectiveness enhanced by use of the new Achromatic Telescopic Squeezing scheme, and other state-of-the-art accelerator technologies, such as superconducting compact RF crab cavities, advanced collimation concepts, and novel power technology based on high temperature superconducting links. The book consists of a series of chapters touching on all issues of technology and design, and each chapter can be read independently. The first few chapters give a summary of the whole project, of the physics motivation and of the accelerator challenges. The subsequent

chapters cover the novel technologies, the new configurations of LHC and of its injectors as well as the expected operational implications. Altogether, the book brings the reader to the heart of technologies for the leading edge accelerator and gives insights into next generation hadron colliders. *Prices of New Machine Tools, as of March 1, 1941 (revised)* Aug 11 2021

### **Changing Jobs**

Feb 05 2021 An essential guide to the future of work in Australia. For many Australians, rapid progress in artificial intelligence, robotics and automation is a

growing anxiety. What will it mean for jobs? What will it mean for their kids' futures? More broadly, what will it mean for equality in this country? Jim Chalmers and Mike Quigley believe that bursts in technology need not result in bursts of inequality, that we can combine technological change with the fair go. But first we need to understand what's happening to work, and what's likely to happen. This is a timely, informative and authoritative book about the changing face of work, and how best to approach it - at both a personal and a political level. Jim Chalmers is a Labor MP and Shadow Minister for

Finance. Before being elected to parliament, Jim was the chief of staff to the Deputy Prime Minister and Treasurer. He has a PhD in political science and international relations and is the author of *Glory Daze* (2013). Mike Quigley spent 36 years with the major global telecommunications company Alcatel, including three years as its president and COO. He was the first employee of the Australian NBN company and its CEO for four years. He is now adjunct professor in the School of Computing and Communications at UTS.

### **The Race for a New Game**

**Machine** May 08 2021  
*Probabilistic Machine Learning* May 28 2020 A detailed and up-to-date introduction to machine learning, presented through the unifying lens of probabilistic modeling and Bayesian decision theory. This book offers a detailed and up-to-date introduction to machine learning (including deep learning) through the unifying lens of probabilistic modeling and Bayesian decision theory. The book covers mathematical background (including linear algebra and optimization), basic supervised learning (including linear and logistic

regression and deep neural networks), as well as more advanced topics (including transfer learning and unsupervised learning). End-of-chapter exercises allow students to apply what they have learned, and an appendix covers notation.

*Probabilistic Machine Learning* grew out of the author's 2012 book, *Machine Learning: A Probabilistic Perspective*. More than just a simple update, this is a completely new book that reflects the dramatic developments in the field since 2012, most notably deep learning. In addition, the new book is accompanied by online Python code,

using libraries such as scikit-learn, JAX, PyTorch, and Tensorflow, which can be used to reproduce nearly all the figures; this code can be run inside a web browser using cloud-based notebooks, and provides a practical complement to the theoretical topics discussed in the book. This introductory text will be followed by a sequel that covers more advanced topics, taking the same probabilistic approach.

### **Gardens and Human Agency in the Anthropocene**

Jul 30 2020 This volume discusses gardens as designed landscapes of mediation between nature and culture,

embodying different levels of human control over wilderness, defining specific rules for this confrontation and staging different forms of human dominance. The contributing authors focus on ways of rethinking the garden and its role in contemporary society, using it as a crossover platform between nature, science and technology. Drawing upon their diverse fields of research, including History of Science and Technology, Environmental Studies, Gardens and Landscape Studies, Urban Studies, and Visual and Artistic Studies, the authors unveil various entanglements

woven in the past between nature and culture, and probe the potential of alternative epistemologies to escape the predicament of fatalistic dystopias that often revolve around the Anthropocene debate. This book will be of great interest to those studying environmental and landscape history, the history of science and technology, historical geography, and the environmental humanities. *It Doesn't Have to Be Crazy at Work* Jun 09 2021 Jason Fried and David Heinemeier Hansson, the authors of the New York Times bestseller Rework,

are back with a manifesto to combat all your modern workplace worries and fears.

May 20 2022

### **Indecent**

**Exposure** Oct 01

2020 When the head of Columbia Pictures, David Begelman, got caught forging Cliff Robertson's name on a \$10,000 check, it seemed, at first, like a simple case of embezzlement. It wasn't. The incident was the tip of the iceberg, the first hint of a scandal that shook Hollywood and rattled Wall Street. Soon powerful studio executives were engulfed in controversy; careers derailed; reputations died; and a ruthless,

take-no-prisoners corporate power struggle for the world-famous Hollywood dream factory began. First published in 1982, this now classic story of greed and lies in Tinseltown appears here with a stunning final chapter on Begelman's post-Columbia career as he continued to dazzle and defraud . . . until his last hours in a Hollywood hotel room, where his story dramatically and poignantly would end.

### *The Love Machine*

Aug 19 2019 The spectacular bestseller from the author of VALLEY OF THE DOLLS. In a time when steak, vodka, and Benzedrine were the three main

staples of a healthy diet, when high-powered executives called each other "baby" and movie stars wore wigs to bed, network tycoons had a name for the TV set: they called it "the love machine." But to supermodel Amanda, socialite Judith and journalist Maggie, "the love machine" meant something else: Robin Stone, "a TV-network titan around whom women flutter like so many moths...The novel deals with his rise and fall as he makes the international sex scene (orgying in London, transvestiting in Hamburg), drinks unlimited quantities and checks out the latest

Nielsens.”—Newsw  
eek “I READ IT IN  
ONE GREEDY  
GULP, ENJOYING  
EVERY  
MINUTE.”—Liz  
Smith “[Susann’s]  
pulp poetry  
resonates to this  
day. WITH HER  
FORMULA OF SEX,  
DRUGS, AND  
SHOW BUSINESS,  
Susann didn’t so  
much capture the  
tenor of her times  
as she did predict  
the Zeitgeist of  
ours.”—Detour  
*Machine* Apr 26  
2020 A haunting  
story of guilt and  
blame in the wake  
of a drowning, the  
first novel by the  
author of *Spectacle*  
Susan Steinberg’s  
first novel,  
*Machine*, is a  
dazzling and  
innovative leap  
forward for a writer  
whose most recent  
book, *Spectacle*,

gained her a  
rapturous following.  
*Machine* revolves  
around a group of  
teenagers—both  
locals and wealthy  
out-of-  
towners—during a  
single summer at  
the shore.  
Steinberg captures  
the pressures and  
demands of this  
world in a voice  
that effortlessly  
slides from  
collective to  
singular, as one girl  
recounts a night on  
which another girl  
drowned. Hoping to  
assuage her guilt  
and evade a similar  
fate, she pieces  
together the details  
of this tragedy, as  
well as the  
breakdown of her  
own family, and  
learns that no one,  
not even she, is  
blameless. A daring  
stylist, Steinberg  
contrasts

semicolon-studded  
sentences with  
short lines that race  
down the page. This  
restless approach  
gains focus and  
power through a  
sharply drawn  
narrative that  
ferociously  
interrogates  
gender, class,  
privilege, and the  
disintegration of  
identity in the  
shadow of trauma.  
*Machine* is the kind  
of novel—relentless  
and bold—that only  
Susan Steinberg  
could have written.  
*A New Machine for  
Producing  
Chunkwood* Aug 23  
2022 De resultaten  
van het testen van  
een prototype van  
een nieuwe  
machine, welke  
boomstammen met

tot dunne schijven  
(10 cm of dunner)  
verkleint. Deze

machine kan toegepast worden in de spaanplaatindustrie of bij de produktie van brandhout

### **The Shame**

**Machine** Sep 19 2019 NEW YORK TIMES EDITORS' CHOICE • A clear-eyed warning about the increasingly destructive influence of America's "shame industrial complex" in the age of social media and hyperpartisan politics—from the New York Times bestselling author of *Weapons of Math Destruction* "O'Neil reminds us that we must resist the urge to judge, belittle, and oversimplify, and instead allow always for complexity and lead always with empathy."—Dave

Eggers, author of *The Every Shame* is a powerful and sometimes useful tool: When we publicly shame corrupt politicians, abusive celebrities, or predatory corporations, we reinforce values of fairness and justice. But as Cathy O'Neil argues in this revelatory book, shaming has taken a new and dangerous turn. It is increasingly being weaponized—used as a way to shift responsibility for social problems from institutions to individuals. Shaming children for not being able to afford school lunches or adults for not being able to find work lets us off the hook as a society. After all,

why pay higher taxes to fund programs for people who are fundamentally unworthy? O'Neil explores the machinery behind all this shame, showing how governments, corporations, and the healthcare system capitalize on it. There are damning stories of rehab clinics, reentry programs, drug and diet companies, and social media platforms—all of which profit from "punching down" on the vulnerable. Woven throughout *The Shame Machine* is the story of O'Neil's own struggle with body image and her recent weight-loss surgery, which awakened her to

the systematic shaming of fat people seeking medical care. With clarity and nuance, O'Neil dissects the relationship between shame and power. Whom does the system serve? Is it counter-productive to call out racists, misogynists, and vaccine skeptics? If so, when should someone be "canceled"? How do current incentive structures perpetuate the shaming cycle? And, most important, how can we all fight back?

[The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies](#) Jan 16 2022 A pair of technology experts describe how

humans will have to keep pace with machines in order to become prosperous in the future and identify strategies and policies for business and individuals to use to combine digital processing power with human ingenuity.

**Biggest Book of Bread Machine Recipes** Aug 31 2020 Specifically designed for the latest bread machine cookers, this taste-tempting cookbook introduces more than 375 recipes from different size loaves, ranging from sweet to classic, along with special sections on Soups & Stews and Sandwiches, and dozens of useful preparation tips.

Original. 40,000 first printing.

**Pink Floyd: The Music and the Mystery** Jan 04 2021 A chronology and analysis of albums, shows, and recordings by Pink Floyd and individual band members as solo artists.

**99 Machine-Quilting Designs** Dec 23 2019 Give your quilts a fabulous finish! Award-winning machine quilter and best-selling author Christa Watson presents a new collection of dynamic machine-quilting ideas. Gain insight and inspiration from step-by-step instructions for 35 walking-foot designs and 64 free-motion techniques, plus

dozens of variations. Each design includes a photo, a description, and a diagram to set you up for plenty of machine-quilting success—even if it's your first time quilting on your home sewing machine.

**The Exquisite Machine** Oct 13 2021 How science is opening up the mysteries of the heart, revealing the poetry in motion within the machine. Your heart is a miracle in motion, a marvel of construction unsurpassed by any human-made creation. It beats 100,000 times every day—if you were to live to 100, that would be more than 3 billion beats across your

lifespan. Despite decades of effort in labs all over the world, we have not yet been able to replicate the heart's perfect engineering. But, as Sian Harding shows us in *The Exquisite Machine*, new scientific developments are opening up the mysteries of the heart. And this explosion of new science—ultrafast imaging, gene editing, stem cells, artificial intelligence, and advanced sub-light microscopy—has crucial, real-world consequences for health and well-being. Harding—a world leader in cardiac research—explores the relation between the emotions and heart

function, reporting that the heart not only responds to our emotions, it creates them as well. The condition known as Broken Heart Syndrome, for example, is a real disorder than can follow bereavement or stress. The *Exquisite Machine* describes the evolutionary forces that have shaped the heart's response to damage, the astonishing rejuvenating power of stem cells, how we can avoid heart disease, and why it can be so hard to repair a damaged heart. It tells the stories of patients who have had the devastating experiences of a heart attack, chaotic heart

rhythms, or stress-induced acute heart failure. And it describes how cutting-edge technologies are enabling experiments and clinical trials that will lead us to new solutions to the worldwide scourge of heart disease.

**Computation, Proof, Machine**

Nov 02 2020

Computation, calculation, algorithms - all have played an important role in mathematical progress from the beginning - but behind the scenes, their contribution was obscured in the enduring mathematical literature. To understand the future of mathematics, this fascinating book

returns to its past, tracing the hidden history that follows the thread of computation.

**The Doomsday**

**Machine** Apr 07

2021 Today, there are over one hundred nuclear reactors operating in our backyards, from Indian Point in New York to Diablo Canyon in California.

Proponents claim that nuclear power is the only viable alternative to fossil fuels, and due to rising energy consumption and the looming threat of global warming, they are pushing for an even greater investment. Here, energy economist Andrew McKillop and social scientist Martin Cohen argue that the nuclear power dream being

sold to us is pure fantasy. Debunking the multilayered myth that nuclear energy is cheap, clean, and safe, they demonstrate how landscapes are ravaged in search of the elusive yellowcake to fuel the reactors, and how energy companies and politicians rarely discuss the true costs of nuclear power plants - from the subsidies that build the infrastructure to the unspoken guarantee that the public will pick up the cleanup cost in the event of a meltdown, which can easily top \$100 billion dollars.

*The Blind*

*Contessa's New*

*Machine* Oct 25

2022 An iridescent jewel of a novel that

proves love is the mother of invention In the early 1800s, a young Italian contessa, Carolina Fantoni, realizes she is going blind shortly before she marries the town's most sought-after bachelor. Her parents don't believe her, nor does her fiancé. The only one who understands is the eccentric local inventor and her longtime companion, Turri. When her eyesight dims forever, Carolina can no longer see her beloved lake or the rich hues of her own dresses. But as darkness erases her world, she discovers one place she can still see-in her dreams. Carolina creates a vivid dreaming life,

in which she can not only see, but also fly, exploring lands she had never known. Desperate to communicate with Carolina, Turri invents a peculiar machine for her: the world's first typewriter. His gift ignites a passionate love affair that will change both of their lives forever. Based on the true story of a nineteenth-century inventor and his innovative contraption, **The Blind Contessa's New Machine** is an enchanting confection of love and the triumph of the imagination. **The Production of Sweet-orange Oil and a New Machine for Peeling Citrus Fruits** Jul 22 2022 Pp. 12.

**Price Schedule No.67: New Machine Tools** Sep 12 2021 **Machine Learning for Asset Management** Oct 21 2019 This new edited volume consists of a collection of original articles written by leading financial economists and industry experts in the area of machine learning for asset management. The chapters introduce the reader to some of the latest research developments in the area of equity, multi-asset and factor investing. Each chapter deals with new methods for return and risk forecasting, stock selection, portfolio construction, performance

attribution and transaction costs modeling. This volume will be of great help to portfolio managers, asset owners and consultants, as well as academics and students who want to improve their knowledge of machine learning in asset management.

**The Song Machine: Inside the Hit Factory**

Dec 15 2021 "An utterly satisfying examination of the business of popular music." —Nathaniel Rich, *The Atlantic*  
There's a reason today's ubiquitous pop hits are so hard to ignore—they're designed that way. *The Song Machine* goes behind the scenes to offer an insider's look at the global hit factories manufacturing the

songs that have everyone hooked. Full of vivid, unexpected characters—alongside industry heavy-hitters like Katy Perry, Rihanna, Max Martin, and Ester Dean—this fascinating journey into the strange world of pop music reveals how a new approach to crafting smash hits is transforming marketing, technology, and even listeners' brains. You'll never think about music the same way again. A Wall Street Journal Best Business Book  
**HBR's 10 Must Reads on AI, Analytics, and the New Machine Age (with bonus article "Why Every Company Needs an**

**Augmented Reality Strategy" by Michael E. Porter and James E. Heppelmann)**

Mar 06 2021

Intelligent machines are revolutionizing business. Machine learning and data analytics are powering a wave of groundbreaking technologies. Is your company ready? If you read nothing else on how intelligent machines are revolutionizing business, read these 10 articles. We've combed through hundreds of Harvard Business Review articles and selected the most important ones to help you understand how these technologies work together, how to adopt them, and

why your strategy can't ignore them. In this book you'll learn how: Data science, driven by artificial intelligence and machine learning, is yielding unprecedented business insights Blockchain has the potential to restructure the economy Drones and driverless vehicles are becoming essential tools 3-D printing is making new business models possible Augmented reality is transforming retail and manufacturing Smart speakers are redefining the rules of marketing Humans and machines are working together to reach new levels of productivity This collection of articles

includes "Artificial Intelligence for the Real World," by Thomas H. Davenport and Rajeev Ronanki; "Stitch Fix's CEO on Selling Personal Style to the Mass Market," by Katrina Lake; "Algorithms Need Managers, Too," by Michael Luca, Jon Kleinberg, and Sendhil Mullainathan; "Marketing in the Age of Alexa," by Niraj Dawar; "Why Every Organization Needs an Augmented Reality Strategy," by Michael E. Porter and James E. Heppelmann; "Drones Go to Work," by Chris Anderson; "The Truth About Blockchain," by Marco Iansiti and Karim R. Lakhani;

"The 3-D Printing Playbook," by Richard A. D'Aveni; "Collaborative Intelligence: Humans and AI Are Joining Forces," by H. James Wilson and Paul R. Daugherty; "When Your Boss Wears Metal Pants," by Walter Frick; and "Managing Our Hub Economy," by Marco Iansiti and Karim R. Lakhani. **Slaves of the Machine** Jan 24 2020 In "Moths to the Flame", Rawlins took lay readers on a tour of the exciting and sometimes scary world to which computers are leading us. Written in an accessible, anecdotal form, his newest book is for those who are new to computers and want to know what

is "under the hood".  
*The Imagination Machine* Jun 21 2022 A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs

across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life: *The Seduction: How to open yourself up to surprises* *The Idea: How to generate new ideas* *The Collision: How to rethink your idea based on real-world feedback* *The Epidemic: How to spread an evolving idea to others* *The New Ordinary: How*

to turn your novel idea into an accepted reality *The Encore: How to repeat the process—again and again.* Imagination is one of the least understood but most crucial ingredients of success. It's what makes the difference between an incremental change and the kinds of pivots and paradigm shifts that are essential to transformation—especially during a crisis. *The Imagination Machine* is the guide you need to demystify and operationalize this powerful human capacity, to inject new life into your company, and to head into unknown territory with the right tools at your

disposal.

**Mean, Green,  
Mystery Machine**

Feb 23 2020

SCOOBY-DOO is an 'Ameri-canine' icon, the most beloved cartoon pooch of all time. Scooby is in the midst of a huge popularity boom, with new TV episodes and a sequel to the hit movie due in summer 04. Based on episodes from the hit new Kids WB! TV show, "What's New, Scooby-Doo," this new line of junior chapter books is designed for first and second-graders who are just learning to read. The books are 48 pages long, with minimal, simple text and lots of illustrations. Zoinks! The Mystery Machine is

acting very strange. It's chasing Scooby and gang all around Coolsville. Like, why is the Mystery Machine being so mean? The kids must crack the case before the Mystery Machine drives them up a wall!

**The Soul of A New  
Machine**

Dec 27  
2022 Pulitzer Prize winner Tracy Kidder memorably records the drama, comedy, and excitement of one company's efforts to bring a new microcomputer to market. Computers have changed since 1981, when *The Soul of a New Machine* first examined the culture of the computer revolution. What has not changed is the feverish pace of the high-tech

industry, the go-for-broke approach to business that has caused so many computer companies to win big (or go belly up), and the cult of pursuing mind-bending technological innovations. *The Soul of a New Machine* is an essential chapter in the history of the machine that revolutionized the world in the twentieth century.

**New Machine**

**Tools** Nov 14 2021

*Heart of the*

*Machine* Dec 03

2020 For Readers of Ray Kurzweil and Michio Kaku, a New Look at the Cutting Edge of Artificial Intelligence  
Imagine a robotic stuffed animal that can read and respond to a child's

emotional state, a commercial that can recognize and change based on a customer's facial expression, or a company that can actually create feelings as though a person were experiencing them naturally. Heart of the Machine explores the next giant step in the relationship between humans and technology: the ability of computers to recognize, respond to, and even replicate emotions. Computers have long been integral to our lives, and their advances continue at an exponential rate. Many believe that artificial intelligence equal or superior to human intelligence

will happen in the not-too-distance future; some even think machine consciousness will follow. Futurist Richard Yonck argues that emotion, the first, most basic, and most natural form of communication, is at the heart of how we will soon work with and use computers. Instilling emotions into computers is the next leap in our centuries-old obsession with creating machines that replicate humans. But for every benefit this progress may bring to our lives, there is a possible pitfall. Emotion recognition could lead to advanced surveillance, and the same technology that can

manipulate our feelings could become a method of mass control. And, as shown in movies like Her and Ex Machina, our society already holds a deep-seated anxiety about what might happen if machines could actually feel and break free from our control. Heart of the Machine is an exploration of the new and inevitable ways in which mankind and technology will interact. The paperback edition has a new foreword by Rana el Kaliouby, PhD, a pioneer in artificial emotional intelligence, as well as the cofounder and CEO of Affectiva, the acclaimed AI startup spun off

from the MIT Media Lab.

**Birth of a New**

**Machine** Nov 26

2022 Written by an avid automobile enthusiast and replica builder, this book explains the process from concept to completion and shines a spotlight on the potential pitfalls. Easy and entertaining to read, "Birth of a New Machine: Building a Cobra Replica" is packed with color photos and information to help you succeed with your replica project.

**Midnight Dawn**

Nov 21 2019 A new adult title from Entangled's Embrace imprint... Book Two of the Mortal Machine series. Her soul remembers his

touch, even if she doesn't. With only three days until the wraith king turns the earth into an all-you-can-eat buffet, Addison Beckett is forced to enlist brooding sentinel Asher Green's help to unlock the Mortal Machine. According to the founder, all she has to do is find the sanctuary—the same sanctuary she can't remember because Asher erased her memories. Trying to save humanity while navigating Asher's lies is a royal pain. But the more time she and Asher spend together, the harder her soul tries to remind her what else he's made her forget—that he loves her, wants her, needs her.

When she's trapped by the wraith king and forced to pick who will stand by her in the coming battle, Addison is faced with an impossible choice: the sentinel she loves who refuses to love her back, or a powerful stranger who insists they're meant to be together. Her decision will decide the fate of humanity, and once decided, can't be undone.

*The Blind*

*Contessa's New*

*Machine* Apr 19

2022 An

enchantingly imagined romance inspired by the true story of the typewriter's invention. Carolina Fantoni, a young contessa in nineteenth-century Italy, is going blind.

Neither her parents nor her fiancé believe her. Only her friend Turri, an eccentric local inventor, understands. As darkness erases Carolina's world, she discovers one place where she can still see—in her dreams—yet she remains isolated from the outside world. Desperate to communicate with Carolina, Turri creates a peculiar contraption for her: the world's first typewriter. His gift ignites a passionate love affair that will mark both their lives forever.

### **Company of One**

Feb 17 2022 What if the real key to a richer and more fulfilling career was not to create and scale a new start-up, but rather, to be

able to work for yourself, determine your own hours, and become a (highly profitable) and sustainable company of one?

Suppose the better—and smarter—solution is simply to remain small? This book explains how to do just that.

Company of One is a refreshingly new approach centered on staying small and avoiding growth, for any size business. Not as a freelancer who only gets paid on a per piece basis, and not as an entrepreneurial start-up that wants to scale as soon as possible, but as a small business that is deliberately committed to staying that way. By staying small, one can have freedom

to pursue more meaningful pleasures in life, and avoid the headaches that result from dealing with employees, long meetings, or worrying about expansion.

Company of One introduces this unique business strategy and explains how to make it work for you, including how to generate cash flow on an ongoing basis. Paul Jarvis left the corporate world when he realized that working in a high-pressure, high-profile world was not his idea of success. Instead, he now works for himself out of his home on a small, lush island off of Vancouver, and lives a much more

rewarding and productive life. He no longer has to contend with an environment that constantly demands more productivity, more output, and more growth. In *Company of One*, Jarvis explains how you can find the right pathway to do the same, including planning how to set up your shop, determining your desired revenues, dealing with unexpected crises, keeping your key clients happy, and of course, doing all of this on your own.

**Climate, Planetary and Evolutionary Sciences** Mar 26 2020 This book presents the result of an innovative challenge, to create a systematic literature overview

driven by machine-generated content. Questions and related keywords were prepared for the machine to query, discover, collate and structure by Artificial Intelligence (AI) clustering. The AI-based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex, interdisciplinary and multidisciplinary, for example, climate, planetary and evolution sciences. Springer Nature has published much on these topics in its journals over the years, so the challenge was for the machine to identify the most

relevant content and present it in a structured way that the reader would find useful. The automatically generated literature summaries in this book are intended as a springboard to further discoverability. They are particularly useful to readers with limited time, looking to learn more about the subject quickly and especially if they are new to the topics. Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey, from the undergraduate student exploring interdisciplinary content, to Master-

or PhD-thesis  
developing  
research questions,  
to the practitioner  
seeking support  
materials, this book  
can serve as an  
inspiration, to name

a few examples. It  
is important to us  
as a publisher to  
make the advances  
in technology easily  
accessible to our  
authors and find  
new ways of AI-  
based author

services that allow  
human-machine  
interaction to  
generate readable,  
usable, collated,  
research content.
