Sessional Papers Dec 29 2022 "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as an addendum to vol. 26, no. 7.

The Monetary Imagination of Edgar Allan Poe Jun 30 2020 In this first-of-its-kind treatment, Heinz Tschachler offers an account of Edgar Allan Poe's relation to the world of banking and money in antebellum America. He contends that Poe gave the full force of his censure to the acrimonious debates about America's money, Andrew

Jackson's bank war, the panic of 1837 and the ensuing depression, and the nation's inability to furnish a "sound and uniform currency." Poe's attitude is overt in his early satires, more subdued in "The Gold-Bug," and almost an undercurrent in writings that enter into and historicize the discovery of gold in California. In Poe's writings much is concealed, though his art also reveals while it conceals, in this instance, a deep felt desire for an authority that would guarantee a measure of permanence and continuity to the nation's currency. That kind of currency was finally furnished by Abraham Lincoln (both were born in 1809; Poe died in 1849), at one time a dedicated reader of Poe's tales and sketches. Wielding his "power of regulation," Lincoln came to save the Union not just militarily but also economically. Under him, the United States government finally provided the kind of "sound and uniform currency" that Poe in his writings could only name and rehearse.

Selected Papers of Freeman Dyson with Commentary Jul 12 2021 This book offers a unique compilation of papers in mathematics and physics from Freeman Dyson's 50 years of activity and research. These are the papers that Dyson considers most worthy of preserving, and many of them are classics. The papers are accompanied by commentary explaining the context from which they originated and the subsequent history of the problems that either were solved or left unsolved. This collection offers a connected narrative of the developments in mathematics and physics in which the author was involved, beginning with his professional life as a student of G. H. Hardy.

*Educational Assessment in a Time of Reform Jul 24 2022
Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is*

good enough . If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.
